A Reader's Guide to Contemporary Literature William Swan Sonnenschein, 1896

Mountain flora of Java, 2nd edition Steenis, 2021-11-29 The mountain flora of Java constitutes a unique natural heritage of Indonesia and indeed of the whole world The most informative and most beautifully illustrated book ever written on this rich resource is doubtlessly *The Mountain Flora of Java* written by the late renowned Dutch biologist C G G J van Steenis with unsurpassed paint drawings of 456 flowering plant species by Amir Hamzah and Moehamad Toha The first edition from 1972 was sold out fairly soon Brill is therefore proud to publish this edition of this seminal work at this point in time There are three very good reasons to reprint the *Mountain Flora* both in English and in the Indonesian language First of all there is the importance of this flora for biodiversity conservation and sustainable use of the vulnerable mountain ecosystems of Java Secondly the unique style and quality of the 456 plant portraits by Amir Hamzah and Moehamad Toha Thirdly there is the science explaining and interpreting the rich botanical diversity in the mountains of Java Although written over 40 years ago Van Steenis approach to the study of botany can still serve as an example and inspiration for young botanists conservationists and policy makers

Biological Invasions David Pimentel, Ph.D., 2011-05-23 The impact of invasive species is second only to that of human population growth and associated activities as a cause of the loss of biodiversity throughout the world In the United States invasions of nonnative plants

animals or microbes cause major environmental damage The second edition of *Biological Invasions Economic and Environmental Costs of Alien Plant Animal and Microbe Species* represents the most current single source reference containing scientific and economic information on this timely subject This volume reconfirms the diverse and unpredictable roles that non native species assume as they invade new ecosystems destruction of vital crops and forests major damages to ecosystems leading to loss of biodiversity soil erosion and water loss The text provides information on how the non native species invade new ecosystems their subsequent environmental effects and estimates on economic impacts *Biological Invasions* supplies scientists policymakers and the public with a better understanding of the invading species and how to prevent their spread and improve control procedures

The Bamboos of the World D. Ohrnberger, 1999-01-29 Bamboos constitute one of a few select categories of plants which are taxonomically related very rich in species and of vital economic and ecological importance Since the early 20th century the accepted number of species of bamboos world wide has tripled However until now information was scattered through numerous often not easily available publications *The Bamboos of the World* is the first comprehensive taxonomic as well as horticultural reference work that provides basic information on bamboos world wide whether they are wild or cultivated well known or rather unknown The work based on bamboo literature facilitates access to further data by citation and a comprehensive bibliography Among the main data included are botanical names with synonyms and geographical distribution of genera and species varieties with their distinctive characters common bamboo names plant introductions to the West plant size and uses The distribution of genera is mapped *The Bamboos of the World* presents a wealth of essential information in an accessible and structured manner It gives the opportunity to check under what names and where relevant information on any bamboo can be found For the researcher with management and development interests it provides a convenient means of basing bamboo resource on a sound understanding of generic and species relationships with names that appear in earlier literature put into context The work should prove to be invaluable for those interested in the morphology taxonomy distribution and cultivation of bamboos It should support botanical forestry horticultural and ecological research training and resource management
