Alternative Internet:

The Future Internet Jenifer Winter, Ryota Ono, 2015-12-14 Readers seeking to gain a handle on the internet's global expansion will find this book rich in scholarly foundations combined with cutting edge discussion of emerging ICTs and services and the complex societal contexts in which they are embedded To explore possibilities to the fullest extent a sociotechnical systems approach is employed focusing on the interplay of technical social cultural political and economic dynamics to explore alternative futures ones that are not part of the dominant discourse about the internet These shared perspectives are not well addressed elsewhere in current discussions Awareness of these dynamics and the fluidity of the future is important as humankind moves forward into the uncertain future Due to the sociotechnical complexity of the Internet policymakers businesspeople and academics worldwide have struggled to keep abreast of developments This volume's approach is intended to stimulate dialogue between academics and practitioners on a topic that will affect most aspects of human life in the near term future

Internet and Surveillance Christian Fuchs, Kees Boersma, Anders Albrechtslund, Marisol Sandoval, 2013-06-17 The Internet has been transformed in the past years from a system primarily oriented on information provision into a medium for communication and community building The notion of Web 2.0 social software and social networking sites such as Facebook Twitter and MySpace have emerged in this context With such platforms comes the massive provision and storage of personal data that are systematically evaluated marketed and used for targeting users with advertising In a world of global economic competition economic crisis and fear of terrorism after 9/11 both corporations and state institutions have a growing interest in accessing this personal data Here contributors explore this changing landscape by addressing topics such as commercial data collection by advertising consumer sites and interactive media self disclosure in the social web surveillance of file sharers privacy in the age of the internet civil watch surveillance on social networking sites and networked interactive surveillance in transnational space This book is a result of a research action launched by the intergovernmental network COST European Cooperation in Science and Technology

The Online Advertising Tax as the Foundation of a Public Service Internet Christian Fuchs, 2018-06-20 Online advertising will soon form the largest share of global advertisement revenues Google and Facebook netted profits of US 29 billion in 2016 While these two giants control more than 66% of all online advertising revenues complex legal company structures have minimised their tax liabilities This extended policy report considers where they should be taxed and where the value of their activities is actually created It argues that tax paid by those platforms should be levied in the country where platform users are located when they click on or view an advertisement Furthermore the report examines the practical steps needed to ensure transparent accounting of taxed transactions in order to avoid long term negative effects for media and democracy Considering counter arguments the author makes the case for an online advertising tax alongside a public service Internet strategy that could support other viable platforms and counter the dangers of duopoly or oligopoly and the high risks of

financial bubbles in a world where advertising is the Internet's dominant business model *Internet Policies and Issues* B. G. Foundations of Critical Media and Information Studies Christian Fuchs, 2011-03-01 Foundations of Critical Media and Information Studies lays down foundations for the analysis of media information and information technology in 21st century information

society as well as introducing the theoretical and empirical tools necessary for the critical study of media and information

Christian Fuchs shows the role classical critical theory can play for analyzing the information society and the information economy as well as analyzing the role of the media and the information economy in economic development the new imperialism and the new economic crisis The book critically discusses transformations of the Internet web 2 0 introduces the notion of alternative media as critical media and shows the critical role media and information technology can play in contemporary society This book provides an excellent introduction to the study of media information technology and information society making it a valuable reference tool for both undergraduate and postgraduate students of subjects such as Media Studies Sociology of Media Social Theory and New Media China's Digital Authoritarianism Monique Taylor,2022-08-24 This book provides a governance perspective on China s digital authoritarianism by examining the political and institutional dynamics of the country s internet sector in a historical context Using leading theories of authoritarian institutions it discusses China s approach to the internet and methods of implementation in terms of party state institutions and policy processes This provides a much needed inside out perspective on digital authoritarianism that avoids the perception of China as some coherent and static monolith The study also offers a powerful rationale for China s cyber sovereignty as an externalisation of its domestic internet governance framework and broader political economic context As China shifts from rule taker to rule maker in world politics the Chinese Dream zhongguo meng is now going global Beijing s digital authoritarian toolkit is being promoted and exported to other authoritarian regimes making China a major driver of digital repression at the global level **Recordkeeping, Ethics and Law** Livia Iacovino,2006-07-20 Distributed networks such as the Internet have altered the fundamental way a record is created captured accessed and managed over time and therefore who controls has access to and is responsible for its authenticity Law and ethics provide the major sources of regulatory controls over participants in such networks This book analyses the interrelationship of recordkeeping ethics and law in terms of existing regulatory models and their application to the Internet environment It proposes the legal and social relationship model as an analytical tool for identifying the rights and obligations of recordkeeping participants in networked business transactions within communities of common interest based on trust The model is also used to examine the legal concepts of property access privacy and evidence with particular reference to its Internet context As legal relationships have their basis in the law of obligations found in both common and civil law systems as well as archival science the model has a broad based application The approach in this book has been to reconcile a number of archival traditions the common strands rather than the differences in particular concepts of identity trust acts actors and social relationships as fundamental concepts to social regulation It is therefore primarily directed to archives and records academics and practitioners especially those working within the realm of electronic records in order to provide them with a sound theoretical and practical knowledge of the legal and ethical dimensions of records created in distributed environments **Digital Democracy and**

the Digital Public Sphere Christian Fuchs, 2022-11-30 This sixth volume in Christian Fuchs Media Communication and Society series draws on radical Humanist theory to address questions around the digital public sphere and the challenges and opportunities for digital democracy today The book discusses topics such as digital democracy the digital public sphere digital alienation sustainability in digital democracy journalism and democracy public service media the public service Internet and democratic communications Fuchs argues for the creation of a public service Internet run by public serviceMedia that consists of platforms such as a public service YouTube and Club 2 0 a renewed digital democracy and digital public sphere version of the legendary debate programme formats Club 2 and After Dark Overall the book presents foundations and analyses of digital democracy that are interesting for both students and researchers in media studies cultural studies communication studies political science sociology Internet research information science as well as related disciplines *Watching YouTube* Michael Strangelove, 2010-01-01 Michael Strangelove provides a broad overview of the world of amateur online videos and the people who make them He describes how online digital video is both similar to and different from traditional home movie making and argues that we are moving into a post television era characterized by mass participation from publisher description **Coordinating the Internet** Brian Kahin, James Keller, 1997 As it grows in scope bandwidth and functionality the Internet will require greater coordination but it is not yet clear what kind of coordinating mechanisms will evolve The essays in this volume clarify this issue and suggest possible models for governing the Internet

The Handbook of Journalism Studies Karin Wahl-Jorgensen, Thomas Hanitzsch, 2009-01-13 This Handbook charts the growing area of journalism studies exploring the current state of theory and setting an agenda for future research in an international context The volume is structured around theoretical and empirical approaches and covers scholarship on news production and organizations news content journalism and society and journalism in a global context Emphasizing comparative and global perspectives each chapter explores Key elements thinkers and texts Historical context Current state of the art Methodological issues Merits and advantages of the approach area of studies Limitations and critical issues of the approach area of studies Directions for future research Offering broad international coverage from top tier contributors this volume ranks among the first publications to serve as a comprehensive resource addressing theory and scholarship in journalism studies As such the Handbook of Journalism Studies is a must have resource for scholars and graduate students working in journalism media studies and communication around the globe *The Role of Business in the Responsibility to Protect* John Forrer, Conor Seyle, 2016-09-29 The book provides a thorough analysis of how the private sector can play a role in the Responsibility to Protect Internet Freedom Software and Illicit Activity Sasha Romanosky, Martin C. Libicki, Zev Winkelman, 2015-06-30 The State Department s Bureau of Democracy Human Rights and Labor DRL as part of its broader effort to protect and advance political and economic freedoms and human rights champions the United States strategy for cyberspace to advocate for fundamental freedoms of speech and association through cyberspace empower civil society actors

human rights activists and journalists in their use of digital media and encourage governments to limit neither the freedom of expression nor the free flow of information To this end DRL funds the development of many cyber security and privacy software programs However there are trade offs associated with any such investment On one hand security and privacy tools can provide safe reliable and anonymous Internet access to people who could otherwise be censored filtered or punished for communicating electronically On the other hand these tools could also be used to conceal or commit illegal activity This report examines the portfolio of tools funded by DRL that helps support Internet freedom and assesses the impact of these tools in promoting U S interests First we note the benefits of these tools in promoting DRL s mission of Internet freedom across the world Second we examine their potential for and examples of their illicit use Third we consider the ability of comparable tools not funded by the DRL to be used for such purposes And fourth we examine safeguards and design and service models that could limit or restrict the use of the technologies for illicit purposes The report concludes that DRL s support for Internet freedom tools has not made them more likely to be used for illicit purposes relative to alternative technologies not funded by the DRL

Back cover *Internet Costs and Cost Models for Public Libraries* Charles R. McClure, John Carlo Bertot, John C. Beachboard, United States. National Commission on Libraries and Information Science, 1995 This report is the result of the statutory mandate by the National Commission on Libraries and Information Science NCLIS to promote activities to extend the nation s library and information handling capability as essential links in the emerging global information infrastructure In a study to inventory the challenges related to libraries roles in the National Information Infrastructure NII it was discovered that libraries had difficulty identifying and describing specific Internet costs The cost elements models and worksheets presented here are intended to serve as useful guides for public libraries and communities in planning Internet connections and services Five representative connectivity models and seven broad cost categories are identified for use by public libraries planning Internet connectivity and services The value of this study rests more with the development of cost models worksheets and cost categories than with the costs represented in this report However the representative costs illustrate the significant variations that are possible in planning the networking permutations and configuration available to the public library community For example an initial one time cost of 1 475 and a recurring annual cost of 12 635 a public library can establish a minimal level of single workstation text based Internet connection A more sophisticated representative multimedia connectivity model is described involving multiple workstations at multiple locations for a one time cost of 266 375 and a recurring annual cost of 154 220 indicating the wide variation in cost and connectivity possibilities The findings are intended to provide a basis for extending the benefits of advanced information services to the nation through its 9 050 public libraries Models are illustrated through 14 figures Two appendices provide research methodology and glossary of Internet terms Contains 14 references Author MAS
