Alternative Loves:

Love's Knowledge Martha C. Nussbaum, 1990-11-15 This volume brings together Nussbaum's published papers on the relationship between literature and philosophy especially moral philosophy. The papers, many of them previously inaccessible to non-specialist readers, deal with such fundamental issues as the relationship between style and content in the exploration of ethical issues, the nature of ethical attention and ethical knowledge, and their relationship to written forms and styles, and the role of the emotions in deliberation and self-knowledge. Nussbaum investigates and defends a conception of ethical understanding which involves emotional as well as intellectual activity and which gives a certain type of priority to the perception of particular people and situations rather than to abstract rules. She argues that this ethical conception cannot be completely and appropriately stated without turning to forms of writing usually considered literary rather than philosophical. It is consequently necessary to broaden our conception of moral philosophy in order to include these forms. Featuring two new essays and revised versions of several previously published essays, this collection attempts to articulate the relationship within such a broader ethical inquiry between literary and more abstractly theoretical elements. Free To Say No Eric L. Jenkins, 2013-09-26 For centuries Augustine's theory of free will has been used to explain why God is not the author of evil and humans are morally responsible for sin. Yet when he embraced the doctrines of unconditional election and operative grace, Augustine began modifying his theory of free will. His final works claim his evolved notion of free will remained consistent with his early view, but this claim has provoked significant debate. Some scholars take him at his word, interpreting his teachings on free will in light of his later predestination teachings. Others reject his claim of continuity and warn of great inconsistencies between his early and later works. Few have undertaken a thorough study of Augustine's works to compare his early notion of free will with his later theory of predestination. Free To Say No is a detailed study of Augustine's work that presents clear evidence in Augustine's own words for a significant discontinuity between his early and later theories, especially the disappearance of the will's freedom to say. **Love's Promises** Martha M. Ertman, 2016-05-24 Blends memoir and legal cases to show how contracts can create family relationships. Most people think of love and contracts as strange bedfellows or even opposites. In Love's Promises, however, law professor Martha Ertman shows that far from cold and calculating, contracts shape and sustain families. Blending memoir and law, Ertman delves into the legal cases, anecdotes, and history of family law to show that love comes in different packages, each shaped by different contracts and mini-contracts, she calls deals. Family law should and often does recognize that variety because legal rules like relationships aren't one-size-fits-all. The most common form of family, which Ertman calls Plan A, come into being through different kinds of agreements than the more uncommon families that she dubs Plan B. Recognizing the contractual core of all families shows that Plan B is neither unnatural nor unworthy of legal recognition, just different. After telling her own moving and often irreverent story about becoming part of a Plan B family of two moms and a dad raising a child, Ertman shows that all kinds of people straight

and gay married and single related by adoption or by genetics use contracts to shape their relationships As couples navigate marriage reproductive technologies adoption and cohabitation they encounter contracts Sometimes hidden and other times openly acknowledged these contracts ensure that the people they think of as family are legally recognized as family in the eyes of the law Family exchanges can be substantial like vows of fidelity or small like I cook and you clean But regardless of scope the agreements shape the emotional social and financial terrain of family relationships Seeing the instrumental role contracts will help readers better understand how contracts and deals work in their own families as well as those around them Both insightful and paradigm shifting Love s Promises lets readers in on the power of contracts and deals to support love in its many forms and to honor the different ways that our nearest and dearest contribute to our daily lives **Manic**

Wagenfuhr,2016-03-30 Christian engagement with economics tends to baptize preexisting sociopolitical perspectives thereby assuming a predetermined metaphysical narrative What happens when the story of the development of economics told from an anthropological and sociological perspective is juxtaposed with a biblical theology that focuses primarily on relationships Wagenfuhr tests a theological method grounded in three kinds of relationships Creator creature estrangement and Reconciler reconciled by comparing these with a fourth relationship the economic He argues that economic relationships and the worlds they create throughout history are the fruit of relationships estranged from God Much theology has committed itself to a metaphysic rooted in the reality of economics and has told a metaphysical story that tends to legitimize current sociopolitical realities Wagenfuhr argues that reconciliation with God is entirely subversive to economic relationships No economic relationship or system is established or justified by God but neither does he reject them Instead the love of God in Christ speaks the economic language of a people with a critical edge leading to loving subversion of any and all economic relationships This book argues for a robust theology that offers the post Christendom church a renewed sense of the total scale of God s mission of reconciliation Love's Labour's Lost William Shakespeare,1998 Love s Labour s Lost now recognized as one of the most delightful and stageworthy of Shakespeare s comedies came into its own both on the stage and

in critical esteem only during the 1930s and 1940s after three hundred years of neglect by the theatre and undervaluation and misuse by critics The Introduction to this new edition pays particular attention to this process of rehabilitation The text based on the quarto of 1598 and taking full account of the extensive scholarly study that text has received over recent years rests on the hypothesis that the quarto goes back probably by way of lost quarto to an authorial manuscript representing the play in a state prior to fair copy If this is so the quarto takes on a special significance because through it we can watch Shakespeare in the act of composition improvising changing his mind and revising as his play develops under his hand The editor offers a number of new readings of difficult and disputed passages together with some suggestions about the way in which the play's notorious tangles may have come about A detailed commentary offers full and helpful guidance to the play's scintillating language

The Erotic Word : Sexuality, Spirituality, and the Bible NY David M. Carr Professor of Old Testament Union Theological Seminary,2002-12-19 Historically the Bible has been used to drive a wedge between the spirit and the body In this provocative book David Carr argues that it can and should do just the opposite Sexuality and spirituality Carr contends are intricately interwoven when one is impoverished the other is warped As a result the journey toward God and the life long engagement with our own sexual embodiment are inseparable Humans the Bible tells us both male and female were created in God s image and eros a fundamental longing for connection that finds abstract good in the pleasure we derive from the stimulation of the senses is a central component of that image The Bible particularly the Hebrew Bible affirms erotic passion both eros between humans and eros between God and humans In a sweeping examination of the sexual rules of the Bible Carr asserts that Biblical family values are a far cry from anything promoted as such in contemporary politics He concludes that passionate love our preoccupation therewith and pursuit thereof is the primary human vocation that eros is in fact the flavoring of life Augustine John M. Rist,1994 This major work constitutes a significant attempt to provide a detailed and accurate account of the character and effects of Augustine s thought as a whole It describes the transformation of Greco Roman philosophy into the version that was to become the most influential in the history of Western thought Augustine weighed some of the major themes of classical philosophy and ancient culture against the truth he found in the Bible and Catholic tradition and reformulated these in Christian dress

The Analogy of Love Gary Chartier,2015-11-09 This book offers an overview of Christian theology organized around the twin themes of divine and human love The book covers the traditional theological topics as well as basic questions of theological method It seeks to integrate a focus on love throughout While love is regularly canvassed as a dominant theme in Christian thought it has rarely been the focus of Christian theological construction or a constraint on theological formulation The book seeks to suggest chapter by chapter how a given topic relates to the broad theme of love The book is written in a way designed to make it accessible to university students and educated laypersons At the same time it takes positions on controverted scholarly issues and the methodological approach outlined at the beginning will be of interest to academic theologians

Loving Creation Gary Chartier,2022-09-27 Is it true that all we need is love Does love capture the essence of Christian ethics Does a love centered ethic need to be impartial in a way that leaves no room at ground level for relationships and projects What is the

place of well being in an ethic of love Loving Creation The Task of Moral Life seeks to answer these questions by showing how a love ethic and an ethic of creation are not at odds but rather reinforce each other Gary Chartier articulates a love centered creation ethic or a creation centered love ethic and applies it to such issues as sex economic life love for enemies and political order In the book Chartier offers a powerful alternative both to natural law theories that seem to lose sight of the welfare of actual people and to the accounts of Christian love that embrace an alienating impartiality He develops an understanding of Christian love as focused on creation that can contribute effectively to enriching both social practices and personal lives Loving Creation is unabashedly theological But the theological considerations it adduces are ones that will allow Christians to engage in the public sphere with adherents of other religious traditions and of none It is a contribution not only to theological understanding but also to personal moral reflection to church practice and to Christian participation in public life

Interfaces and Interface Conditions Andreas Späth, 2012-02-14 The volume contains articles that focus on the interface between linguistic and conceptual knowledge The issues addressed in the volume include the preconditions of every level of the language system that are required for the transformation of linguistic information into conceptual representations In accordance with Chomsky's Minimalist language model the language system is embedded into the performative systems where language is a part of the cognitive competence of human beings i.e. system of articulation and perception A/P and the conceptual intentional system C/I During the formation of linguistic structures every performative system obtains well formed representations as its input information The articles of the volume show how interface conditions determine the linguistic representations on each level of the linguistic system Interface conditions result in requirements for the ordering of linguistic elements The syntactic transformation achieves a point where the linguistic structure formation branches to two distinct representational levels Both levels deliver instructions for the systems of performance A/P and C/I Linearization takes place on the syntactic surface of a sentence The linearization of linguistic elements is manifest at the derivational point of Spell out and also on the level of the phonological form PF This means that on the one hand linearization is relevant to the phonetic aspect of linguistic expressions and on the other hand the interpretation of linguistic utterances is based on hierarchical structures On the level of Logical Form LF all operations apply which don't have any influence on the linear order in overt syntax In addition they affect the generation of hierarchical structures The structure obtained on LF is the representational format of the semantic form of a sentence
