Rhodes,2012-04-21 Since the early 1990s the federal role in education exemplified by the controversial No Child Left Behind Act NCLB has expanded dramatically Yet states and localities have retained a central role in education policy leading to a growing struggle for control over the direction of the nation s schools In An Education in Politics Jesse H Rhodes explains the uneven development of federal involvement in education While supporters of expanded federal involvement enjoyed some success in bringing new ideas to the federal policy agenda Rhodes argues they also encountered stiff resistance from proponents of local control Built atop existing decentralized policies new federal reforms raised difficult questions about which level of government bore ultimate responsibility for improving schools Rhodes s argument focuses on the role played

by civil rights activists business leaders and education experts in promoting the reforms that would be enacted with federal policies such as NCLB It also underscores the constraints on federal involvement imposed by existing education policies hostile interest groups and above all the nation s federal system Indeed the federal system which left specific policy formation and implementation to the states and localities repeatedly frustrated efforts to effect changes national reforms lost their force as policies passed through iterations at the state county and municipal levels Ironically state and local resistance only encouraged civil rights activists business leaders and their political allies to advocate even more stringent reforms that imposed heavier burdens on state and local governments Through it all the nation s education system made only incremental steps toward the goal of providing a quality education for every child      Public-Private Partnerships in the USA Tony Wall,2013-03-05 Broadly a Public Private Partnership or PPP is any collaboration between the public and private sector but research in the UK has tended to focus on those that have been used for major infrastructure projects such as roads schools and hospitals This book compares and contrasts PPP research in the UK with that of cases in the USA including interviews with some of the key stakeholders decision makers in the public sector contractors and users of PPPs in North America and observations of PPPs in action such as schools and roads No prior major studies have compared the UK and USA when it comes to the development and operation of PPPs and this book fills a gap in the literature addressing a number of key questions including Is the private sector viewed with less suspicion in the USA when it comes to projects that would normally fall under the aegis of the public sector How do politics affect PPPs How do key players in the PPP process define project success determine the merits and drawbacks of the initiative and deal with controversial elements of the scheme such as value for money and risk transfer The result is a volume that offers practical advice for the future development of PPPs in the UK      *Resources in Education* ,1999      Building Coalitions DIANE Publishing Company,1995-03 A series of fact sheets on topics related to coalition formation maintenance networking understanding the process construction of a coalition coalition facilitator guide coalition functioning coalition goal setting communication in coalitions mobilizing the community working with diverse cultures tapping private sector resources turf issue much more      **Hamric & Hanson's Advanced Practice Nursing - E-Book** Mary Fran Tracy,Eileen T.
