*Alternative Visions* Fred Dallmayr, 1998-04-02 Globalization is often seen as a process of universal standardization under the auspices of market economics technology and hegemonic power Resisting this process without endorsing parochial self enclosure Fred Dallmayr explores alternative visions that are rooted in distinct vernacular traditions and facilitate cross cultural learning in an open ended global arena Dallmayr charts a grassroots approach to the global village an approach that relies on ethical and religious traditions and popular beliefs as launching pads for cross cultural learning dialogue and self transformation Truly interdisciplinary in nature *Alternative Visions* combines general philosophy the philosophy of religion and political cultural and post colonial theory It is an important book for students and scholars in all of these areas of study

Border Crossings Fred Reinhard Dallmayr, 1999-01-01 Comparative political theory is at best an embryonic and marginalized endeavor As practiced in most Western universities the study of political theory generally involves a rehearsal of the canon of Western political thought from Plato to Marx Only rarely are practitioners of political thought willing and professionally encouraged to transgress the canon and thereby the cultural boundaries of North America and Europe in the direction of genuine comparative investigation *Border Crossings* presents an effort to remedy this situation fully launching a new era in political theory Thirteen scholars from around the world examine the various political traditions of West South and East Asia and engage in a reflective cross cultural discussion that belies the assumptions of an Asian essence and of an unbridgeable gulf between West and non West The denial of essential differences does not however amount to an endorsement of essential sameness As viewed and as practiced by contributors to this ground breaking volume comparative political theorizing must steer a course between uniformity and radical separation this is the path of border crossings

**New Approaches to Comparative Politics** Jennifer S. Holmes, 2008-01-01 The field of comparative politics traditionally has been divided into two camps on the one hand quantitatively driven work on a broad scale on the other more qualitative area studies This edited collection promotes a new approach to comparative politics theoretically informed comparative analysis The contributors essays are innovative in their interweaving of case studies of the political situations in particular regions from the United States to Colombia to Mali with the project of political theorizing **In Search of the Good Life**

Fred Dallmayr, 2007-08-31 The great German novelist Thomas Mann implored readers to resist the persistent and growing militarism of the mid twentieth century To whom should we turn for guidance during this current era of global violence political corruption economic inequality and environmental degradation For more than two millennia the world s great thinkers have held that the ethically good life is the highest purpose of human existence Renowned political philosopher Fred Dallmayr traces the development of this notion finding surprising connections among Aristotelian ethics Abrahamic and Eastern religious traditions German idealism and postindustrial social criticism In Search of the Good Life does not offer a blueprint but rather invites readers on a cross cultural quest Along the way the author discusses the teachings of Aristotle Confucius Nicolaus of Cusa Leibniz and Schiller in addition invoking more recent writings of Gadamer and Ricoeur as guideposts and sources of hope during our troubled times Among contemporary themes Dallmayr discusses are the role of the classics in education proper and improper ways of spreading democracy globally the possibility of transnational citizenship the problem of politicized evil and the role of religion in our predominantly secular culture Dallmayr restores the notion of the good life as a hallmark of personal conduct civic virtue and political engagement and as the road map to enduring peace In Search of the Good Life seeks to arouse complacent and dispirited citizens guiding them out of the distractions of shallow amusements and perilous resentments in the direction of mutual learning and civic pedagogy a direction that will enable them to impose accountability on political leaders who stray from fundamental ethical standards

*The International Political Thought of Carl Schmitt* Louiza Odysseos, Fabio Petito, 2007-03-06 Presenting the first critical analysis of Carl Schmitt s *The Nomos of the Earth* and how it relates to the epochal changes in the international system that have risen from the collapse of the Westphalian international order There is an emerging recognition in political theory circles that core issues such as order social justice rights need to be studied in their global context Schmitt s international political thought provides a stepping stone in these related paths offering an alternative history of international relations of the genesis achievements and demise of the Westphalian system Writing at a time when he believed that the spatial political and legal order the nomos of the earth had collapsed he highlighted the advent of the modern state as the vehicle of secularization tracing how this interstate order was able to limit and rationalize and humanize war Providing a large number of case studies including global terrorism humanitarian intervention and US hegemony this book will give further impetus to and expand the nascent debate on the significance of Schmitt s legal and political thought for international politics *The International Political Thought of Carl Schmitt* will be of interest to students and scholars of international relations law and history

Ackerly, 2008-06-26 From the diverse work and often competing insights of women s human rights activists Brooke Ackerly has written a feminist and a universal theory of human rights that bridges the

relativists concerns about universalizing from particulars and the activists commitment to justice Unlike universal theories that rely on shared commitments to divine authority or to an enlightened way of reasoning Ackerly s theory relies on rigorous methodological attention to difference and disagreement She sets out human rights as at once a research ethic a tool for criticism of injustice and a call to recognize our obligations to promote justice through our actions This book will be of great interest to political theorists feminist and gender studies scholars and researchers of social movements

**Journeys to the Other Shore** Roxanne Leslie Euben, 2006 The contemporary world is increasingly defined by dizzying flows of people and ideas But while Western travel is associated with a pioneering spirit of discovery the dominant image of Muslim mobility is the jihadi who travels not to learn but to destroy Journeys to the Other Shore challenges these stereotypes by charting the common ways in which Muslim and Western travelers negotiate the dislocation of travel to unfamiliar and strange worlds In Roxanne Euben s groundbreaking excursion across cultures geography history genre and genders travel signifies not only a physical movement across lands and cultures but also an imaginative journey in which wonder about those who live differently makes it possible to see the world differently This extraordinary book shows that curiosity about the unknown the quest to understand foreign cultures critical distance from one s own world and the desire to remake the foreign into the familiar are not the monopoly of any single civilization or epoch Euben demonstrates that the fluidity of identities cultures and borders associated with our postcolonial globalized world has a long history one shaped not only by Western power but also by an Islamic ethos of travel in search of knowledge Publisher s description

**Constellations of the Transnational**, 2015-06-29 In the wake of proliferating discourses around globalisation and culture some central questions around cultural politics have acquired a commonsensical and hegemonic character in contemporary intellectual discourse The politics of difference the possibilities of hybridity and the potential of multiple liminalities frame much discussion around the transnational dimensions of culture and post identity politics In this volume the economic political and social consequences of the focus on culture in contemporary theories of globalization are analysed around the disparate fields of architecture museum discourse satellite television dub poetry carnival and sub national theatre The discourses of hybridity diaspora cultural difference minoritization are critically interrogated and engaged with through close analysis of cultural objects and practices The essays thus intervene in the debate around modernity globalization and cultural politics and the volume as a whole provides a critical constellation through which the complexity of transnational culture can be framed Thinking through the particular the essays limn the absent universality of forms of capitalist globalization and the volume as a whole provides multiple perspectives from which to enter the singular modernity of our times in all its complexity
