Alternatives To The Automobile Worldwatch Paper:

What Needs to be Done to Promote Bicycling and Walking? ,1992 **Resources in Education** ,1991 **Measures to Overcome Impediments to Bicycling and Walking** Gary H. Zehnpfenning,1993 *The Enigma of Automobility* Sudhir Chella Rajan,2010-11-23 Rajan investigates air pollution policy as one based on how to make cars less polluting Putting the onus on auto manufacturers and owners has generated an elaborate scheme of emissions testing and pollution control devices and does not look at the technology itself as the heart of the problem Rajan focuses his study on data collected in Los Angeles to show how emissions testing burdens the poor who tend to own older cars that pollute more Rajan argues for democratic control over technology steering it away from special interest groups and toward a long term ethical resolution

Future Survey Annual 1992 Michael Marien,1993-01-30 Saving Our Planet Mostafa K. Tolba,2012-12-06 *Saving Our Planet* analyses the changes both positive and negative that have occurred in the environment in the past two decades It focuses not only on the state of the environment but also on the interactions between development activities and the environment It highlights the main responses since 1972 to protect the environment It is based on a wide ranging review of the scientific literature UNEP reports and other sources and over 500 references are listed Reauthorization of Surface Transportation Programs United States. Congress. House. Committee on Public Works and Transportation. Subcommittee on Surface Transportation,1991 *Land Use* ,1993 **Reasons why Bicycling and Walking are and are Not Being Used More Extensively as Travel Modes** Stewart A. Goldsmith,1992 **Salvemos El Planeta** Mostafa K. Tolba,2012-12-06 *Environmental Management* Michael V. Russo,1999 Unique in its integration of cases and readings this text seeks to increase environmental awareness sensitivity and literacy in students This collection of readings and cases can be used as a supplement or a primary text and is perfect for business government and society ethics strategic management and industrial ecology courses Transport in Transition Stephen Peake,1994 *Planning for Sustainability* Stephen M. Wheeler,2004-08-19 Existing patterns of urbanization are unsustainable in the long run Current development practices consume enormous amounts of land and resources damage local ecosystems produce pollutants create huge inequalities between groups of people and undermine local community and quality of life Unfortunately planning has itself led to many unsustainable development practices *Planning for Sustainability* presents a straightforward systematic analysis of how more sustainable cities and towns can be brought about It does so in a highly readable manner that considers in turn each scale of planning international national regional municipal neighbourhood site and building In the process it illustrates how sustainability initiatives at these different scales interrelate and how an overall framework can be developed for more livable communities **Forum for Applied Research and Public Policy** ,1994 **Eastern Transportation Corridor (ETC), SR-231 Between SR-91 and South of I-5 at SR-133, Orange County, Supplemental EIS** ,1994 **The Car and Its Environments** Knut Holtan Sørensen,1994 Planning for Sustainability Stephen Wheeler,2013-07-18 How can human

communities sustain a long term existence on a small planet This challenge grows ever more urgent as the threat of global warming increases Planning for Sustainability presents a wide ranging intellectually well grounded and accessible introduction to the concept of planning for more sustainable and livable communities The text explores topics such as how more compact and walkable cities and towns might be created how local ecosystems can be restored how social inequalities might be reduced how greenhouse gas emissions might be lowered and how more sustainable forms of economic development can be brought about The second edition has been extensively revised and updated throughout including an improved structure with chapters now organized under three sections the nature of sustainable planning issues central to sustainable planning and scales of sustainable planning New material includes greater discussion of climate change urban food systems the relationships between public health and the urban environment and international development Building on past schools of planning theory Planning for Sustainability lays out a sustainability planning framework that pays special attention to the rapidly evolving institutions and power structures of a globalizing world By considering in turn each scale of planning international national regional municipal neighborhood and site and building the book illustrates how sustainability initiatives at different levels can interrelate Only by weaving together planning initiatives and institutions at different scales and by integrating efforts across disciplines can we move towards long term human and ecological well being

Ethics and Urban Design Gideon S. Golany, 1995-08-01 The city according to urban design scholar Gideon Golany is the largest and most complicated project ever produced by humankind In *Ethics and Urban Design* he challenges design professionals to reexamine their basic assumptions about the urban environment and offers design strategies based on enduring human values In search of answers to the paradoxical problems of the modern city Golany takes the reader through the sweep of human settlements from the dawn of civilization to the present His authoritative examination of the genesis of the city is illuminated by instructive examples of early urban centers Mesopotamia the Indus River Valley the Egyptian cities of the Nile and the capital cities of ancient China all are examined in the light of what made them work as major centers of human activity What Golany finds in the success stories of the past are cohesive sociocultural values that shaped the design of homes neighborhoods and cities These ethical values helped to maintain an equilibrium within the society that permeated its natural social and human made environments In the present era conversely he finds a major disconnection between human values and the ethics of technology which has resulted in confusion imbalance and dehumanization To help designers gain a perspective on possible solutions Golany explains leading comprehensive design strategies including the valley theory the urban border zone concept and the regional concept of Patrick Geddes In the case study of contemporary Holland he details what a small densely populated country has been able to achieve through design planning rooted in environmental ethics Future Frontiers for Urban Design the culminating section of this groundbreaking book opens with Golany's vision of the future city He examines the issues of thermal performance and climate as they relate to urban design and offers the concept of geospace the earth

enveloped habitat Buttressing his presentation with detailed information on the mechanics of geospace Golany describes case studies of the successful use of earth enveloped habitats in China and Tunisia He makes a powerful argument for the geospace city as a renewal of ancient traditions that can restore the vital equilibrium between nature and human settlements that we seem to have lost Ethics and Urban Design is a distinguished scholar's analysis and prescription for the city it offers an abundance of stimulating ideas for the architects designers and planners who have assumed responsibility for its future Ethics Urban Design draws on historical examples and contemporary case studies from around the world to illustrate urban design strategies that can help restore equilibrium to the natural social and built environments of the city In this stimulating book urban design scholar Gideon Golany offers architects designers and planners both an in depth analysis of the fundamental issues of urban design and practical options for the design of the future city Examines the genesis and development of the city from the earliest settlements to the rise of urban society Presents urban design strategies based on historical examples of early urban centers including Mesopotamia the Indus River Valley Egypt and China Offers case studies of environmental success stories from Europe Asia and Africa Details geospace design options the use of underground space for diversified land use housing and transportation Fully illustrated with over 80 photographs drawings and diagrams

The Natural Wealth of Nations David Roodman, 2014-04-08 Every year the world's governments spend over US 700 billion subsidizing activities that harm the environment The Natural Wealth of Nations shows how cutting these wasteful subsidies can actually boost the economy save tax and help the environment By raising taxes on harmful activities like air pollution whilst cutting taxes on payrolls and profits pollution is discouraged and both work and investment boosted In a comprehensive global survey The Natural Wealth of Nations provides examples from Sweden to Spain to Malaysia of the growing number of countries that are successfully using these market based approaches to clean up their environments This is an accessible practical book offering concrete proposals for cleaning up the world's environment and overcoming ecological ignorance

Beyond the Car Sue Zielinski, Gordon Laird, Joyce Nelson, 1995
