History of Analysis Hans Niels Jahnke, 2003 Analysis as an independent subject was created as part of the scientific
 revolution in the seventeenth century Kepler Galileo Descartes Fermat Huygens Newton and Leibniz to name but a few
 contributed to its genesis Since the end of the seventeenth century the historical progress of mathematical analysis has
 displayed unique vitality and momentum No other mathematical field has so profoundly influenced the development of
 modern scientific thinking Describing this multidimensional historical development requires an in depth discussion which
 includes a reconstruction of general trends and an examination of the specific problems This volume is designed as a
 collective work of authors who are proven experts in the history of mathematics It clarifies the conceptual change that
 analysis underwent during its development while elucidating the influence of specific applications and describing the
 relevance of biographical and philosophical backgrounds The first ten chapters of the book outline chronological
 development and the last three chapters survey the history of differential equations the calculus of variations and functional
 analysis Special features are a separate chapter on the development of the theory of complex functions in the nineteenth
 century and two chapters on the influence of physics on analysis One is about the origins of analytical mechanics and one
 treats the development of boundary value problems of mathematical physics especially potential theory in the nineteenth

century The book presents an accurate and very readable account of the history of analysis Each chapter provides a comprehensive bibliography Mathematical examples have been carefully chosen so that readers with a modest background in mathematics can follow them It is suitable for mathematical historians and a general mathematical audience *Economic Geology of the Beaver Quadrangle, Pennsylvania* Arthur Coe Spencer, Geological Survey (U.S.), George Curtis Martin, Henry Gannett, Lester Hood Woolsey, Louis Caryl Graton, Ray Smith Bassler, Samuel Stinson Gannett, Charles Will Wright, David Henry Baldwin, 1907
