Bookbinding and the Conservation by Hand Laura S. Young, 1981 **The Technique of Islamic Bookbinding** Karin Scheper, 2018-11-01 The Technique of Islamic Bookbinding is the first monograph dedicated to the technical development of the bookbinding tradition in the Islamic world Based on an assessment of the extensive oriental collections in the Leiden University Library the various sewing techniques constructions and the application of covering materials are described in great detail A comparative analysis of the historic treatises on bookbinding provides further insight into the actual making of the Islamic book In addition it is demonstrated that variations in time and place can be established with the help of distinctive material characteristics Karin Scheper's work refutes the perception of Islamic bookbinding as a weak structure which has generally but erroneously been typified as a case binding Instead the author argues how diverse methods were used to create sound structures thus fundamentally challenging our understanding of the Islamic bookbinding practice Karin Scheper has been awarded the De La Court Award 2016 by The Royal Netherlands Academy of Arts and Sciences for her study of the bookbinding tradition in the Islamic world *The Changing Role of Book Repair in ARL Libraries*, 1993 *Bookbinding and Conservation by Hand* Laura S. national parks to underwrite Ethiopia's imperial claims to regional hegemony with ancient history. The key findings of this book highlight a continuity in Ethiopian history despite the political ruptures caused by the 1974 revolution and UNESCO's transformation from knowledge producer to actual provider of development policies. The particular focus on the bureaucratic and political practices of heritage bridges a gap between cultural heritage studies and the history of international organisations. The result is a first study of the global discourse on heritage as it emerged in the 1960s development decade.

Calcium-Binding Protein Protocols Hans J. Vogel, 2008-02-04 Calcium plays an important role in a wide variety of biological processes. This divalent metal ion can bind to a large number of proteins by doing so it modifies their biological activity or their stability. Because of its distinct chemical properties calcium is uniquely suited to act as an on/off switch or as a light dimmer of biological activities. The two books entitled *Calcium Binding Protein Protocols Volumes I and II* focus on modern experimental analyses and methodologies for the study of calcium binding proteins. Both extracellular and intracellular calcium binding proteins are discussed in detail. However, proteins involved in calcium handling, e.g. calcium pumps and calcium channels, fall outside of the scope of these two volumes. Also calcium binding proteins involved in bone deposition will not be discussed as this specific topic has been addressed previously. The focus of these two books is on studies of the calcium binding proteins and their behavior in vitro and in vivo. The primary emphasis is on protein chemistry and biophysical methods. Many of the methods described will also be applicable to proteins that do not bind calcium. *Calcium Binding Protein Protocols* is divided into three main sections. The section entitled *Introduction and Reviews* provides information on the role of calcium in intracellular secondary messenger activation mechanisms. Moreover, unique aspects of calcium chemistry and the utilization of calcium in dairy proteins as well as calcium binding proteins involved in blood clotting are addressed.
