Washington* Michael Rudolph West,2006-01-04 Booker T Washington has long held an ambiguous position in the pantheon of black leadership Lauded by some in his own lifetime as a black George Washington he was also derided by others as a Benedict Arnold In *The Education of Booker T Washington* Michael West offers a major reinterpretation of one of the most complex and controversial figures in American history West reveals the personal and political dimensions of Washington s journey up from slavery He explains why Washington s ideas resonated so strongly in the post Reconstruction era and considers their often negative influence in the continuing struggle for equality in the United States West s work also establishes a groundwork for understanding the ideological origins of the civil rights movement and discusses Washington s views on the fate of race and nation in light of those of Thomas Jefferson Frederick Douglass Martin Luther King Jr and others West argues that Washington s analysis was seen as offering a solution to the problem of racial oppression in a nation professing its belief in democracy That solution was the idea of race relations In practice this theory buttressed segregation by supposing that African Americans could prosper within Jim Crow s walls and without the normal levers by which other Americans pursued their interests Washington did not West contends imagine a way to perfect democracy and an end to the segregationist policies of southern states Instead he offered an ideology that would obscure the injustices of segregation and preserve some measure of racial peace White Americans by embracing Washington s views could comfortably find a way out of the moral and political contradictions raised by the existence of segregation in a supposedly democratic society This was and is Washington s legacy a form of analysis at once obvious and concealed that continues to prohibit the realization of a truly democratic politics

Washington and his idea of industrial education at Tuskegee Institute* Bernhard Hagen,2004-09-21 Seminar paper from the year 2002 in the subject History America grade very good University of New Orleans Department of History course SE Recent American History language English abstract In this paper I want to discuss the life the ideas and the influence of Booker Taliaferro Washington Born as a slave Booker T Washington rose to become a well known leader of colored people in the United States Although he always tried to show other black men and women how to improve their lives his leadership became controversial Ironically his critics argued he would keep the colored people down and he would slow down improvements Washington s most important idea was the self education and self help and from the founding of Tuskegee Institute in 1881 to his death in 1915 Booker T Washington tried to realize this idea and was very influential in doing this The second very influential black leader of that time was William E B Du Bois His concept of the talented tenth represented those who thought that Washington placed too much importance on industrial education To

understand Booker T Washington's ideas and concepts it is necessary to take a look at his life. Therefore I want to show the story of Booker T Washington, his childhood and his rise to a leader of the colored people in the beginning of this paper. Then I want to discuss the Tuskegee Institute and Washington's approach to the problems of the African American population.

Booker T. Washington Kristin Thoennes Keller, 2005-09 An introduction to the life of Booker T. Washington, the former slave who started the Tuskegee Institute. *The Education of Blacks in the South, 1860-1935* James D. Anderson, 2010-01-27 James Anderson critically reinterprets the history of southern black education from Reconstruction to the Great Depression. By placing black schooling within a political, cultural, and economic context, he offers fresh insights into black commitment to education, the peculiar significance of the Tuskegee Institute, and the conflicting goals of various philanthropic groups among other matters. Initially, ex-slaves attempted to create an educational system that would support and extend their emancipation, but their children were pushed into a system of industrial education that presupposed black political and economic subordination. This conception of education and social order, supported by northern industrial philanthropists, some black educators, and most southern school officials, conflicted with the aspirations of ex-slaves and their descendants, resulting at the turn of the century in a bitter national debate over the purposes of black education. Because blacks lacked economic and political power, white elites were able to control the structure and content of black elementary, secondary, normal, and college education during the first third of the twentieth century. Nonetheless, blacks persisted in their struggle to develop an educational system in accordance with their own needs and desires. **Philosophy of Education** J.J.
