Shaping the Future , 2007-01-01 World wide the production of teachers has become a sharp political issue during the early years of the twenty first century Current systems for ensuring a supply of capable and

knowledgeable teachers have come sustained under attack from politicians economists parents organisations and social critics alike There is less agreement now about teacher education than in any time over the pass fifty years Much of the debate in the public and political arenas has been driven by narrow and expedient consideration and too much of it demonstrates a poor grasp of the deep and complex issues which teacher education in a democracy must confront At the same time there has been a serious educational debate which has focused on what a well trained teacher ought to be able to do and what methods of training and education can produce competent teachers The chapters of this book address these issues in a critical way asking what should the objectives of teacher education be The authors demonstrate the international reach of the debate over teacher education and they ground their discussions within the national contexts of their own experience All the authors share the view that teacher education involves much more than acquiring a set of skills and techniques Important as these are the well trained teacher needs for example to have an understanding of the contexts of teaching of the reasons why we teach of the role of schools as institutions within political environments as well as a coherent perspective on curriculum and the relevant bodies of theory which give overall point to what is being done What teacher education entails will probably never be beyond contestation at least not so long as it takes place within capitalist democracies These democracies with their tensions running between liberal ideals and economic imperative push and pull teacher education in contradictory directions At present educational ideals seems too quickly and too dogmatically to be traded for immediate fiscal policy The authors of these chapters articulate the reasons why such short term thinking will be detrimental to any approach to teacher education which commits itself to producing well rounded and comprehensively professional teachers

The Burden of Educational Exclusion, 2010-01-01 School was nothing but a taboo for me concludes Johannah a young South African after recounting her life story Johannah is one of the early school leavers who features in this book Figures on participation in education in Africa show that despite government agreements and policies developed under the banner of Education for All this remains a remote goal In several countries programmes on Universal Primary Education have improved access to education but do those who enter school remain there until they have reached a suitable level Do they acquire enough competences at primary and secondary school to survive the tough daily life in sub Saharan countries What happens to children and young adults who leave school early What measures can be taken to prevent them from doing so This book is based on research carried out in Eastern and Southern Africa by scholars from Africa and the Netherlands who cooperated within the framework of the ESLA project The contributions to this book reflect the exchanges and discussions which took place in this research group initiated by staff of Mzumbe University in Tanzania Uganda Martyrs University and the University of Groningen in the Netherlands The group aims to go beyond figures and uncover the causes effects and stories of the young people involved as well as explore promising new strategies with which to address their needs As early school leaving is not exclusively an African problem a contribution on the Dutch situation is also

included The book concludes that exclusion from education has far reaching effects not only for the young people involved but also for the society in which they live The burden of educational exclusion should be the joint responsibility of developing and developed countries The authors hope the book will contribute not only to a greater understanding of the phenomenon of early school leaving but also challenge it in terms of developing policies and programmes that can prevent educational exclusion and support those who already find themselves in such a situation Beyond the Great Divide Judith Gill,2004 Author and educator Judy Gill addresses the ongoing debate between coeducation or single sex schooling She starts by giving a brief overview of schooling in Australia and its various school systems and then follows with an examination of the rationale for single sex schooling and the cases for and against **Child, Adolescent and Family Development** Phillip T. Challenging Violence in Schools Martin Mills,2001 This book explores the relationship between violence and masculinity within schools There is a clear need to explore this relationship A substantial amount of evidence exists which demonstrates how boys are the major perpetrators of violence in schools from extreme acts of violence such as school shootings in the US to more common forms of schoolyard bullying and that both girls and boys are their victims The book suggests that violence has been masculinized in such a way that boys often perpetrate violence as a means of demonstrating their perception of what counts as a valued form of masculinity This masculinization of violence has often meant that girls experience violence from boys who are seeking to demonstrate their superiority over girls and it has also meant that some boys often experience violence due to their non conformity to dominant images of masculinity In order to support these arguments the book draws on extensive interview data collected from boys and teachers who were involved in anti violence programmes in their schools

Masculinity Goes to School Rob Gilbert,Pam Gilbert,2017-05-18 Originally published in 1998 This book offers a balanced overview of the issues surrounding boys and education It looks beyond the often hysterical debate in the popular media to analyse what is happening with boys in the school system and how this can be understood The authors argue that popular constructions of masculinity affect boys in all parts of their lives in families peer groups and work cultures at home at school at work and at leisure Offering insight into key issues such as literacy sport bad behaviour sexuality race and ethnicity and popular culture this book also looks at programs and approaches to working with boys which have been successful

Negotiating Masculinities and Bodies in Schools Kevin G. Davison,2007 Explores gender and the body in relation to the postmodern condition challenging the stability of modernist understandings of gender and making a case for viewing gender as a pedagogical tool rather than as a threat

Raising Boys' Achievement in Schools Kevan Bleach,1998 Based on case studies and observations in the school setting the contributors to this study examine ways in which boys can be guided towards better achievement academically They offer a range of practical solutions to a persistent problem

What about the Boys? Wayne Martino,Bob Meyenn,2001 How can teachers address the challenge of educating boys for life in the 21st century What aspects of schooling are particularly problematic for boys How do issues of class race and sexuality impact upon boys educational experiences This edited collection brings together leading researchers from Australia United Kingdom and the United States to explore issues of boys schooling and masculinities within the context of the current concern about the education of boys The contributors draw on detailed empirical research to highlight some important issues that are not addressed in public debates about boys in the media Chapter topics include international perspectives on debates about boys teaching boys programs for boys in schools boys and risk taking boys and discipline boys

and sexuality Afro American boys indigenous boys in Australian schools boys and reading boys and maths boys dance and sport boys and science girls talk about boys The book will be important and compelling reading for all teachers concerned with the education of boys
