Alas Poor Darwin:

Alas Poor Darwin Hilary Rose, Steven Rose, 2010-12-15 Today genes are called upon to explain almost every aspect of our lives from social inequalities to health sexual preference and criminality Based on Darwin's theory of evolution and natural selection Evolutionary Psychology with its claim that it's all in our genes has become the most popular scientific theory of the late 20th century Books such as Richard Dawkins's *The Selfish Gene* Edward O Wilson's *Consilience* and Steven Pinker's *The Language Instinct* have become bestsellers and frame the public debate on human life and development we can see their influence as soon as we open a Sunday newspaper In recent years however many biologists and social scientists have begun to contest this new biological determinism and shown that Evolutionary Psychology rests on shaky empirical evidence flawed premises and unexamined political presuppositions In this provocative and ground breaking book Hilary and Steven Rose have gathered together the most eminent and outspoken critics of this fashionable ideology ranging from Stephen Jay Gould and Patrick Bateson to Mary Midgley Tim Ingold and Annette Karmiloff Smith What emerges is a new perspective on human development which acknowledges the complexity of life by placing at its centre the living organism rather than the gene

Retreat of the Social, The Bruce Kapferer, 2005 Missing the Revolution Jerome H. Barkow, 2006 The naturalizing perspective of Darwinian thought has become one of the major intellectual currents of our time pervading contemporary understandings of human nature and society Unfortunately many social scientists in sociology psychology and sociocultural anthropology have failed to engage with it Barkow asks his fellow social scientists to put aside their all too common preconceptions and stereotypes of the biological and to consider a powerful argument that is far different from that of those who once invoked a vocabulary of genes and Darwin as a justification for genocide He argues that the theoretical perspective that has been so successful when applied to the behavior of every other animal species can be applied just as successfully to our own and that the real debate is about how to apply it **BOOK JACKET** **The Miseducation of Women** James

Tooley, 2003-01-04 To what extent has feminism benefited women To what extent have women really been liberated James Tooley argues that the implication of many women's testimony is that feminism so far has failed to deliver the promised benefits and has even in some ways proved harmful Bringing together many women's voices from Bridget Jones to Simone de Beauvoir he provides a radical rethinking for feminism and sexual politics in the 21st century **Darwin's Bards** John
