Ed Gorman, Martin H. Greenberg

Braided World:

The Braided World Kay Kenyon, 2008 When you get a message from deep space should you answer Earth has cause to believe that the universe is not a friendly place But one woman a singer well past her performance years and seeking one last adventure funds the mission that will accept an ambiguous invitation to the stars Bailey Shaw chooses the young and untested Anton Prados to lead the interplanetary expedition But when they make first contact with the alien Dassa she and Anton receive a troubling reception The Dassa appear human But they are badly altered humans and the crew increasingly finds them disturbing even revolting And the Dassa in turn are appalled by them As Bailey makes inroads with the commoners and Anton navigates the intrigues at court the clash between the cultures escalates bringing the crew one by one to the most difficult choice of their lives To survive they must unravel the mystery of the Dassa and of human and alien existence

Braided Worlds Alma Gottlieb, Philip Graham, 2012-09-15 In a compelling mix of literary narrative and ethnography anthropologist Alma Gottlieb and writer Philip Graham continue the long journey of cultural engagement with the Beng people of Côte d'Ivoire that they first recounted in their award winning memoir *Parallel Worlds* Their commitment over the span of several decades has lent them a rare insight Braiding their own stories with those of the villagers of Asagb and Kosangb Gottlieb and Graham take turns recounting a host of unexpected dramas with these West African villages prompting serious questions about the fraught nature of cultural contact Through events such as a religious leader's declaration that the authors six year old son Nathaniel is the reincarnation of a revered ancestor or Graham's late father being accepted into the Beng afterlife or the increasing sometimes dangerous madness of a villager the authors are forced to reconcile their anthropological and literary gaze with the deepest parts of their personal lives Along with these intimate dramas they follow the Beng from times of peace through the times of tragedy that led to Côte d'Ivoire's recent civil conflicts From these and many other interweaving narratives and with the combined strengths of an anthropologist and a literary writer *Braided Worlds* examines the impact of postcolonialism race and global inequity at the same time that it chronicles a living breathing village community where two very different worlds meet

Organizations Michel Zarka,Elena Kochanovskaya,William Pasmore,2019-04-01 New digital technologies are changing the way organizations are designed and work is done Companies that have seized this opportunity are finding that they can speed up innovation enhance collaboration across boundaries and enable greater commitment and creativity This totally new approach for digitally enabled collaboration doesn t stop at the edge of an organization s boundary but extends beyond it in space and time We refer to these new ways of organizing as braids an intertwined network of contributors with different capabilities not controlled or managed by a formal hierarchy who work together to invent ways to accomplish a common purpose in line with organization s mission and strategy Braids allow significant advantages over traditional hierarchical mechanistic and bounded ways of organizing These include access to knowledge and capabilities that are key to achieving breakthrough levels of performance improved coordination among individuals and groups performing interdependent tasks increased organizational agility enhanced knowledge processing as experts contribute more directly to the most important technical and strategic decisions and greater motivation as people team together to leverage their capabilities to innovate and accelerate performance Learning from the trailblazing experimentation of companies like Airbus Procter Gamble Red Hat and Dassault Syst mes this book outlines how to approach designing braided organizations for a variety of purposes such as enhancing open innovation or enabling greater supply chain adaptability in order to respond to changing customer demands In the past human limitations have restricted the ways we organize companies for growth Today there s no excuse for allowing the organizational chart as it s currently drawn to constrain possibilities for improved performance and innovation

Quantum Groups and Their Applications in Physics Leonardo Castellani,Julius Wess,Società italiana di fisica,1996 This book focuses on quantum groups i e continuous deformations of Lie groups and their applications in physics

These algebraic structures have been studied in the last decade by a growing number of mathematicians and physicists and are found to underlie many physical systems of interest. They do provide in fact a sort of common algebraic ground for seemingly very different physical problems. As it has happened for supersymmetry, the q group symmetries are bound to play a vital role in physics even in fundamental theories like gauge theory or gravity. In fact q symmetry can be considered itself as a generalization of supersymmetry evident in the q commutator formulation. The hope that field theories on q groups are naturally regularized begins to appear founded and opens new perspectives for quantum gravity. The topics covered in this book include conformal field theories and quantum groups, gauge theories of quantum groups, anyons, differential calculus on quantum groups and non commutative geometry, Poisson algebras, 2 dimensional statistical models, 2 + 1 quantum gravity, quantum groups and lattice physics, inhomogeneous q groups, q Poincaré group and deformed gravity and gauging of W algebras.

Worlds Near and Far Kay Kenyon, 2019-07-13 Of starships, aliens and butterflies. Collected in this volume are stories set in space and at home as far as Alpha Centauri and as close as a town near you. In space we'll walk the decks of a generation ship, visit a starship graveyard and test drive quantum teleportation. On the home planet we'll watch gargoyles come to life, meet aliens who offer far flung tourism, ride on the shoulders of an avatar and enter a new green world where metal and plastic bow down to the seeds of time. There will also be a butterfly. Kenyon writes beautifully, her characters are multilayered and her extrasolar worlds are real and nuanced while at the same time truly alien. Robert J Sawyer *The World's Finest Mystery and Crime Stories* Ed Gorman, Martin H. Greenberg, 2025-09-23 The best suspense and mystery from around the world including stories by such greats as Carol Anne Davis, Robert S. Levinson, Rhys Bowen, Joyce Carol Oates and more. Editors Ed Gorman and Martin H. Greenberg have scoured the world to present the biggest and most consistently entertaining collection of crime and suspense stories from across the globe. Their first rate picks are a diverse and exciting mix of stories by big names, award winners and fresh voices. The 2003 anthology features the year's Edgar Award winning stories, Silver Dagger Award winning stories from the U.K. and spine tingling tales from writers who might soon win those awards themselves. This volume is a feast of more than thirty gripping tales from bestselling authors. This is the anthology of choice for every fan of suspense fiction, whether they love cozies, hardboiled or any shade in between. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Cruising World, 1983-01
Stochastic Processes and Operator Calculus on Quantum Groups U. Franz, René Schott, 2013-03-14 This book aims to present several new developments on stochastic processes and operator calculus on quantum groups. Topics which are treated include operator calculus, dual representations, stochastic processes and diffusions, Appell polynomials and systems in connection with evolution equations. Audience: This volume contains introductory material for graduate students who are new to the field as well as more advanced material for specialists in probability theory, algebraic structures, representation theory, mathematical physics and theoretical physics.

The Great Fashion Designers Brenda Polan, Roger Tredre, 2009-11-15 From

Charles Frederick Worth to Nicolas Ghesquiere designers have propelled fashion from an elite craft into a cornerstone of contemporary popular culture This brilliantly written analysis of the achievements of the 50 greatest names in international fashion explores their lives both personal and professional drawing on the latest academic research and on the best of fashion journalism including the authors own interviews with designers spanning a 30 year period The designers working methods and career highlights are outlined in detailed and wittily written entries that capture the spirit of their times From Poiret and Patou to Gernreich and Galliano the sometimes provocative selection of 50 names poses stimulating questions about the definition of a fashion designer in the modern era A ground breaking book this is a definitive introduction to fashion designers that is essential reading for both students and general readers alike **The World's Greatest Hair**
