The Publishers Weekly, 1967-11 **Play and STEM Education in the Early Years** Sue Dale Tunnicliffe, Teresa J. Kennedy, 2022-06-16 This edited book provides an overview of unstructured and structured play scenarios crucial to developing young children's awareness, interest, and ability to learn Science Technology Engineering and Mathematics (STEM) in informal and formal education environments. The key elements for developing future STEM capital, enabling children to use their intuitive critical thinking and problem-solving abilities and promoting active citizenship and a scientifically literate workforce, begins in the early years as children learn through play, employing trial and error and often investigating on their own. Forty-seven STEM experts come together from 16 countries: Argentina, Australia, Belgium, Canada, England, Finland, Germany, Israel, Jamaica, Japan, Malta, Mauritius, Mexico, Russia, Sweden, and the USA, and describe educational policies and experiences related to young learners 3-4 years of age as well as students attending formal nursery school, early primary school, and the early years classes post 5 years of age. The book is intended for parents seeking to provide STEM activities for their children at home and in playgroups; citizen scientists seeking guidance to provide children with quality educational activities; daycare practitioners providing educational structures for young children from birth to formal education; primary school teachers and preservice teachers seeking to teach preschool kindergarten or children typically aged 5-8 years old in grades 1-3 as well as researchers and policy makers working in science didactics with small children. **Pro-Child Politics** Katy Faust, 2024-09-24 In *Pro Child Politics*, Katy Faust has mobilized a collection of experts who apply her children before adults approach to their areas of expertise. From porn to debt, foreign policy to religious liberty, each chapter explains how a child first approach isn't just nice, it's a necessity. Contributors explain how the needs of children are being ignored and propose practical, bold reforms that will ensure the next generation will not only survive but thrive.
