Brave New Schools Jim Cummins, Dennis Sayers, 1997-03-15 *Brave New Schools* is the first book in the cultural literacy debate that considers the impact of the information superhighway and its presence in the classroom Stunning in its implications for the future of learning guided by technology the book offers hopeful solutions to the problems of cultural differences and the future of our children

Alternative Futures in Special Education James John Gallagher, Bluma Beryl Weiner, 1986

Beliefs, Reasoning, and Decision Making Roger C. Schank, Ellen Langer, 2013-06-17 It is not unusual for a festschrift to include offerings from several areas of study but it is highly unusual for those areas to cross disciplinary lines This book in doing just that is a testimony to Bob Abelson's impact on the disciplines of social psychology artificial intelligence and cognitive science and the applied areas of political psychology and decision making The contributors demonstrate that their association with Abelson whether as students or colleagues has resulted in an impressive intellectual cross fertilization

This set of four volumes on Educational Change brings together evidence and insights on educational change issues from leading writers and researchers in the field from across the world Many of these writers whose chapters have been specially written for these books have been investigating helping initiate and implementing educational change for most or all of their lengthy careers Others are working on the cutting edge of theory and practice in educational change taking the field in new or even more challenging directions And some are more skeptical about the literature of educational change and the assumptions on which it rests They help us to approach projects of understanding or initiating educational change more deeply reflectively and realistically Educational change and reform have rarely had so much prominence within public policy in so many different places Educational change is ubiquitous It figures large in Presidential and Prime Ministerial speeches It is at or near the top of many National policy agendas Everywhere educational change is not only a policy priority but also major public news Yet action to bring about educational change usually exceeds people s understanding of how to do so effectively

Computing and Educational Studies Eugene F. Provenzo, Jr.,2014-05-01 This special issue calls for a greater awareness of computing as a critical area of study for those interested in educational studies Its purpose is to open up a wider dialogue about computing and education than has previously existed in the field The questions raised provide the basis for a lively discussion and analysis of the role of educational studies in interpreting the role of computing in our culture and educational system This issue also provides a model for exploring other topics of similar significance and importance to the field in future issues of the journal

Learning from Computers: Mathematics Education and Technology Christine Keitel-Kreidt,Kenneth Ruthven,2012-12-06 The NATO Advanced Research Workshop on Mathematics Education and Technology was held in Villard de Lans France between May 6 and 11 1993 Organised on the initiative of the BaCoMET Basic Components of Mathematics Education for Teachers group Christiansen Howson and Otte 1986 Bishop Mellin Olsen and van Dormolen 1991 the workshop formed part of a larger NATO programme on Advanced Educational Technology Some workshop members had already participated in earlier events in this series and were able to contribute insights from them similarly some members were to take part in later events The problematic for the workshop drew attention to important speculative developments in the applications of advanced information technology in mathematics education over the last decade notably intelligent tutoring geometric construction symbolic algebra and statistical analysis Over the same period more elementary forms of information technology had started

to have a significant influence on teaching approaches and curriculum content notably arithmetic and graphic calculators standard computer tools such as spreadsheets and databases and computer assisted learning packages and computer microworlds specially designed for educational purposes *Toys, Games, and Media* Jeffrey Goldstein,David Buckingham,Gilles Brougere,2004-09-10 This book is a state of the art look at where toys have come from and where they are likely to go in the years ahead The focus is on the interplay between traditional toys and play and toys and play that are mediated by or combined with digital technology As well as covering the technical aspects of computer mediated play activities the authors consider how technologically enhanced toys are currently used in traditional play and how they are woven into childrens lives The authors contrast their findings about technologically enhanced toys with knowledge of traditional toys and play They link their studies of toys to goals in education and to entertainment and information transfer This book will appeal to students researchers teachers child care workers and more broadly the entertainment industry It is appropriate for courses that deal with the specialized subject of toys and games media studies education and teacher training and child development
