Brazilian Amazon Rainforest Global Ecopolitics Development And Democracy:

The Brazilian Amazon Rainforest Luiz C. Barbosa, 2000 Barbosa sociology San Francisco State University provides a global world systemic analysis of the problem of deforestation of the Brazilian Amazon rainforest He shows how changes in global ecopolitics demanding sustainable development coupled with the onset of democracy in Brazil substantially altered the battle over the future of Amazonia He describes deforestation in the region in the context of an expanding frontier of global capitalism and compares Amazon experiences with those of Costa Rica Malaysia and Indonesia *The Brazilian Amazon Rainforest* Luiz C. Barbosa, 2000 Barbosa sociology San Francisco State University provides a global world systemic analysis of the problem of deforestation of the Brazilian Amazon rainforest He shows how changes in global ecopolitics demanding sustainable development coupled with the onset of democracy in Brazil substantially altered the battle over the future of Amazonia He describes deforestation in the region in the context of an expanding frontier of global capitalism and compares Amazon experiences with those of Costa Rica Malaysia and Indonesia Guardians of the Brazilian Amazon Rainforest: Environmental Organizations and Development Luiz C. Barbosa, 2015-05-08 The Amazon region is the focus of intense conflict between conservationists concerned with deforestation and advocates of agro industrial development This book focuses on the contributions of environmental organizations to the preservation of Brazilian Amazonia It reveals how environmental organizations such as Greenpeace Friends of the Earth WWF and others have fought fiercely to stop deforestation in the region It documents how the history of frontier expansion and environmental struggle in the region is linked to Brazil's position in an evolving capitalist world economy It is shown how Brazil's effort to become a developed country has led successive Brazilian governments to devise development projects for Amazonia The author analyses how globalization has led to the expansion of international commodity chains in the region particularly for mineral ores soybeans and beef He shows how environmental organizations have politicized these commodity chains as weapons of conservation through boycotting certain products while other pro development groups within Brazil claim that such organizations threaten Brazil's sovereignty over its own resources Indigenous Amazonia, Regional Development and Territorial Dynamics Walter Leal Filho, Victor T. King, Ismar Borges de Lima, 2020-08-04 This book brings together a valuable collection of case studies and conceptual approaches that outline the present state of Amazonia in the 21st century The many problems are described and the benefits as well as the achievements of regional development are also discussed The book focuses on three themes for discussion and recommendations indigenous peoples their home the forest and the ways to protect and sustain their natural home biodiversity conservation Using these three themes this volume offers a comprehensive critical review of the facts that have been the reality of Amazonia and fills a gap in the literature The book will appeal to scholars professors and practitioners An outstanding group of experienced researchers and individuals with detailed knowledge of the proposed themes have produced chapters on an array of inter related issues to demonstrate the current situation and future prospects

of Amazonia Issues investigated and debated include territorial management indigenous territoriality and land demarcation ethnodevelopment indigenous higher education and capacity building natural resource appropriation food security and traditional knowledge megadevelopmental projects indigenous acculturation modernization of Amazonia and its regional integration anthropogenic interventions protected areas and conservation political ecology postcolonial issues and the sustainability of Amazonia

Nation-States and the Global Environment Erika Marie Bsumek, David Kinkela, Mark Atwood Lawrence, 2013-04-02

Hardly a day passes without journalists policymakers academics or scientists calling attention to the worldwide scale of the environmental crisis confronting humankind While climate change has generated the greatest alarm in recent years other global problems desertification toxic pollution species extinctions drought and deforestation to name just a few loom close behind The scope of the most pressing environmental problems far exceeds the capacity of individual nation states much less smaller political entities To compound these problems economic globalization the growth of non governmental activist groups and the accelerating flow of information have fundamentally transformed the geopolitical landscape Despite the new urgency of these challenges however they are not without historical precedent As this book shows nation states have long sought agreements to manage migratory wildlife just as they have negotiated conventions governing the exploitation of rivers and other bodies of water Similarly nation states have long attempted to control resources beyond their borders to impose their standards of proper environmental exploitation on others and to draw on expertise developed elsewhere to cope with environmental problems at home This collection examines this little understood history providing case studies and context to inform ongoing debates

Successful Adaptation to Climate Change Susanne Moser, Maxwell Boykoff, 2013-07-18

What does successful adaptation look like This is a question we are frequently asked by planners policy makers and other professionals charged with the task of developing and implementing adaptation strategies While adaptation is increasingly recognized as an important climate risk management strategy and on the ground adaptation planning activity is becoming more common place there is no clear guidance as to what success would look like what to aim for and how to judge progress This edited volume makes significant progress toward unpacking the question of successful adaptation offering both scientifically informed and practice relevant answers from various sectors and regions of the world It brings together 18 chapters from leading experts within the field to present careful analyses of different cases and situations questioning throughout commonly avowed truisms and unspoken assumptions that have pervaded climate adaptation science and practice to date This book offers not one answer but demonstrates how the question of success in important ways is normative and context specific It identifies the various dimensions of success such as economic political institutional ecological and social explores the tensions between them and compiles encouraging evidence that resolutions can be found The book appraises how climatic and non climatic stressors play a role what role science does and can play in adaptation decision making and how trade offs and other concerns and priorities shape adaptation planning and

implementation on the ground This is timely interdisciplinary text sheds light on key issues that arise in on the ground adaptation to climate change It bridges the gap between science and practical application of successful adaptation strategies and will be of interest to both students academics and practitioners *Canadian Ecopolitics* Rosalind Warner, Peter Stoett, Wilfrid Greaves, 2025-04-30 *Canadian Ecopolitics* provides a comprehensive overview of the intersection between environmental issues and political processes in Canada It explores key concepts historical developments and contemporary challenges in environmental governance highlighting the diverse world views that shape ecopolitical discourse from resource extractivism to deep ecology Rosalind Warner Peter Stoett and Will Greaves analyse Canada's role on the global stage as well as the challenges of multilevel governance of natural resources The book traces the country's ecopolitical history from pre colonial times through confederation to modern environmental movements The book emphasizes the critical relationship between environmental issues and political processes in governing vital resources such as energy water climate oceans and biodiversity making this analysis both timely and essential The authors explore the complex interactions among different levels of governance Indigenous perspectives and competing interests that influence Canadian environmental policy With a critical focus on the challenges and opportunities within Canada's environmental landscape *Canadian Ecopolitics* offers valuable insights for students policymakers and engaged citizens aiming to understand and transform this crucial area of governance *Amazon Town* Charles Wagley, 2014 *Amazon Town A Study of Human Life in the Tropics* is Charles Wagley's classic ethnography of peasant life in the Amazon with updated material by Conrad Kottak and Richard Pace

The Politics of South American Boundaries Carlos Parodi, 2002-04-30 Parodi shows that boundary disputes have and continue to play a major role in creating tensions in South America Of the 25 international territorial boundaries that exist in South America eight were marked with major wars eight with lesser wars and five with some level of violence As recently as 1995 the armies of Ecuador and Peru were at war to define a boundary In 1982 Argentina went to war inspired by the call to restore a piece of its mutilated national territory Venezuela and Guyana Guyana and Suriname and Suriname and French Guiana have not completed boundary demarcation agreements Bolivia s insistence on its right for sovereign access to the Pacific Ocean is a source of tension with Chile and Peru Colombia and Venezuela have unresolved boundary issues in the Gulf of Venezuela Clearly boundary disputes have and continue to play a major role in creating larger conflicts within South America Territorial boundaries are marks on the ground but as Parodi shows their staying power or stability depends on their grip on consciousness By examining the boundary theory of South American states and its implementation he also explains how the symbolic system of South American boundaries is used to instill national identity mobilize people to war and control population and territory This text will be of particular interest to scholars students and researchers involved with Latin American politics diplomacy and international relations

Tropical Forests, International Jungle M. Smouts, 2003-05-29 Marie Claude Smouts looks at the issue of rain forest depletion and global environmental policies Beginning with how the issue entered the world stage in the 1980s despite alarms over the issue in the 1950s Tropical Forests International Jungle explores the complexities of what are tropical forests what role they play not only in environmentalism but in trade health care and almost every facet of natural and social life for those living there and beyond Although for most in the developed world tropical forests have gained a status of part of our world heritage these forests are not really part of the global commons or a global public good Developing nations maintain control over the forests within their borders and often use the forests as they see fit The international system for mediating the issue is a fractured group of non governmental organizations and transnational networks often with competing views of how to manage tropical forests Despite this seemingly grim picture Smouts is optimistic A changing world view toward forest depletion is influencing countries both North and South Although forests will be used commercially it is a dynamic process that should maintain them far into the

Bratman, 2019 Sustainable development is among the foremost ideas that guide societal aspirations around the world This text interrogates the concept through a critical lens examining both its history and the trajectory of its manifestations in the Brazilian Amazon Tropical Deforestation Sharon L. Spray, Matthew David Moran, 2006-04-27 Tropical Deforestation introduces readers to the important concepts for understanding the environmental challenges and consequences of the deforestation Contributions from scientists and academics in the social sciences and humanities provide readers with an initial tool kit for understanding the concepts central to their disciplinary perspective and the multi dimensional aspects of deforestation *Ecologically Unequal Exchange* R. Scott Frey, Paul K. Gellert, Harry F. Dahms, 2018-07-04 At a time of societal urgency surrounding ecological crises from depleted fisheries to mineral extraction and potential pathways towards environmental and ecological justice this book re examines ecologically unequal exchange EUE from a historical and comparative perspective The theory of ecologically unequal exchange posits that core or northern consumption and capital accumulation is based on peripheral or southern environmental degradation and extraction In other words structures of social and environmental inequality between the Global North and Global South are founded in the extraction of materials from as well as displacement of waste to the South This volume represents a set of tightly interlinked papers with the aim to assess ecologically unequal exchange and to move it forward Chapters are organised into three main sections theoretical foundations and critical reflections on ecologically unequal exchange empirical research on mining deforestation fisheries and the like and strategies for responding to the adverse consequences associated with unequal ecological exchange Scholars as well as advanced undergraduate and graduate students will benefit from the spirited re evaluation and extension of ecologically unequal exchange theory research and praxis
