Illusions in Motion Erkki Huhtamo,2023-08-22 Tracing the cultural material and discursive history of an early manifestation of media culture in the making Beginning in the late eighteenth century huge circular panoramas presented their audiences with resplendent representations that ranged from historic battles to exotic locations Such panoramas were immersive but static There were other panoramas that moved hundreds and probably thousands of them Their history has been largely forgotten In Illusions in Motion Erkki Huhtamo excavates this neglected early manifestation of media culture in

the making The moving panorama was a long painting that unscrolled behind a window by means of a mechanical cranking system accompanied by a lecture music and sometimes sound and light effects Showmen exhibited such panoramas in venues that ranged from opera houses to church halls creating a market for mediated realities in both city and country In the first history of this phenomenon Huhtamo analyzes the moving panorama in all its complexity investigating its relationship to other media and its role in the culture of its time In his telling the panorama becomes a window for observing media in operation Huhtamo explores such topics as cultural forms that anticipated the moving panorama theatrical panoramas the diorama the panoramania of the 1850s and the career of Albert Smith the most successful showman of that era competition with magic lantern shows the final flowering of the panorama in the late nineteenth century and the panorama s afterlife as a topos traced through its evocation in literature journalism science philosophy and propaganda Excellent Various Business Employments, Respectable and Money Getting Everett MAY,1860 Descriptions of various money making opportunities with recipes for inks ice cream perfumes artificial flower making sweet making coloring photographs crystal enamelling c May provides hints for opening a reading room and for putting on magic lantern and diorama shows *Discourses of Vision in Nineteenth-Century Britain* Jonathan Potter,2018-09-22 This book offers an innovative reassessment of the way Victorians thought and wrote about visual experience It argues that new visual technologies gave expression to new ways of seeing using these to uncover the visual discourses that facilitated informed and shaped the way people conceptualised and articulated visual experience In doing so the book reconsiders literary and non fiction works by well known authors including George Eliot Charles Dickens G H Lewes Max Nordau Herbert Spencer and Joseph Conrad as well as shedding light on less known works drawn from the periodical press By revealing the discourses that formed around visual technologies the book challenges and builds upon existing scholarship to provide a powerful new model by which to understand how the Victorians experienced conceptualised and wrote about vision **An Illustrated Descriptive Catalogue of Optical, Mathematical, Philosophical, photographic, and standard meteorological instruments, made and manufactured by Negretti and Zambra** ,1859
