Distance We Travel:

Travel Fast or Smart? David Metz, 2016-09-01 Britain does not have a coherent transport policy and conventional transport economics has reached a dead end A transport policy should incorporate systematic thinking about the travel needs of society but in Britain public investment in the transport system has been extraordinarily volatile We closed underused railways and then experienced a doubling of passenger numbers prompting huge new investment We gave up making substantial investments in motorways but we have now chosen to revive the road construction effort in a big way We vacillate on road pricing introducing congestion charging successfully in London but backing off elsewhere because of local opposition We have delayed the decision about whether and where to build additional airport capacity for decades This mess has come about because policy has focused on big construction projects and time savings when it should have been focusing on the part that people and places play in economic development This book sets out the principles that could underpin a strategic policy for transport Instead of focusing piecemeal on getting from place to place ever faster we need to think about how and where we want the economy to develop and about how new digital technologies can help us achieve what is needed

Toward a Composition Made Whole Jody L. Shipka, 2011-04-30 To many academics composition still represents typewritten texts on 8 5 x 11 pages that follow rote argumentative guidelines In Toward a Composition Made Whole Jody Shipka views composition as an act of communication that can be expressed through any number of media and as a path to meaning making Her study offers an in depth examination of multimodality via the processes values structures and semiotic practices people employ every day to compose and communicate their thoughts Shipka counters current associations that equate multimodality only with computer digitized or screen mediated texts which are often self limiting She stretches the boundaries of composition to include a hybridization of aural visual and written forms Shipka analyzes the work of current scholars in multimodality and combines this with recent writing theory to create her own teaching framework Among her methods Shipka employs process oriented reflection and a statement of goals and choices to prepare students to compose using various media in ways that spur their rhetorical and material awareness They are encouraged to produce unusual text forms while also learning to understand the composition process as a whole Shipka presents several case studies of students working in multimodal composition and explains the strategies tools and spaces they employ She then offers methods to critically assess multimodal writing projects Toward a Composition Made Whole challenges theorists and compositionists to further investigate communication practices and broaden the scope of writing to include all composing methods While Shipka views writing as crucial to discourse she challenges us to always consider the various purposes that writing serves

Snow, Brigham Young, Joseph Smith Jr., John A. Widtsoe, 2022-11-13 Mormon Classics is a compelling anthology that weaves together an array of transformative writings reflective of the spiritual and theological foundations of the Latter day Saint movement This collection captures the profound diversity in literary styles from the doctrinal expositions to the evocative

The collection features an enriched tapestry of voices, each contributing uniquely to the overarching theology and cultural narrative of Mormonism. The authors, from Joseph Smith Jr.'s foundational teachings to Eliza R. Snow's inspired verses, offer a cross-section of the religious fervor, intellectual inquiry, and personal conviction that define this religious tradition. This anthology stands as a testament to the influence of key historical figures and the evolving interpretation and understanding of Mormon doctrine, deeply embedded in cultural and historical contexts. All Hands, 1969 Hearings United States. Congress. Senate. Committee on Commerce, 1967 Hearings, Reports and Prints of the Senate Committee on Commerce United States. Congress. Senate. Committee on Commerce, 1967 *The Universe* Jacques Vanier, 2011 In this book, the author gives a complete picture of the physical laws that appear to regulate the functioning of the Universe, from the atomic to the cosmic world. The book makes a description of the main fields of physics: classical physics, relativity, quantum mechanics, and particle physics, as they are applied to the atomic world and the cosmos to describe how the whole Universe has evolved to the present state. The description concentrates on the essentials, describing our present knowledge of those physical laws and outlining our limitations in understanding the whole picture. The description is done essentially without equations, except for a few important and simple ones. The text includes a short Annex for mathematically inclined readers who wish to see how the physical principles and laws expressed in words can be visualized in the language of mathematics. However, the book can be read totally without referring to that Annex. Also, *The Universe* explains in depth those laws and outlines their limitations. However, the author does it in a simple language that should be understandable to non-specialists. In particular, the author occasionally uses two young characters placed in various situations to explain the physics involved in those situations by means of their observations. The author uses also numerous simple pictures and graphics that make the text more easily comprehensible.
