the faith with the bomber crews he has been assigned to protect Experience the ecstasy of total victory as Ralph Hanks becomes the Navy's first Hellcat ace in a day when he destroys five Japanese fighters over the Gilbert Islands in a single mission A superb interviewer Hammel has collected some of the very best air combat tales from America's war with Japan Combined with the four other volumes in The American Aces Speak series this work will stand as an enduring testament to the brave men who fought the first and last air war in which high performance piston engine fighters held sway These are stories of bravery and survival of men and machines pitted against one another in heart stopping unforgiving high speed aerial combat The American Aces Speak is a highly charged emotional rendering of what men felt in the now dim days of personal combat at the very edge of our living national history There was never a war like it and there never will be again These are America's eagles and the stories are their own in their very own words Eric Hammel is the author of nearly thirty other books including Pacifica Press's Carrier Clash Carrier Strike Aces Against Germany Aces Against Japan II Aces at War and Aces in Combat He lives with his family near San Francisco Critical Acclaim for The American Aces Speak Series The Marine Corps Aviation Association Yellow Sheet says The recounting of each story is done in the pilot's own words This is a powerful technique that draws readers into the action and introduces them to the world of the fighter pilot The American Fighter Aces Bulletin says Some of the episodes are well known others have never been written before But each account delivers something intensely personal about the Pacific Air War The Library Journal says No PR hype or dry as dust prose here Hammel allows his flyers to tell their stories in their own way Exciting stuff aviation and World War II buffs will love Book Page says For those who have an interest in World War II or those who simply like to read of drama in the skies Eric Hammel's Aces Against Japan is recommended reading It is a must for any historian's bookshelf WWII Aviation Booklist says Hammel provides a veritable feast of aviation combat narrative As always in this series the entries in Aces at War have been carefully selected to provide the most entertaining ride possible for his readers Easily the best series available on air combat Get them all *All Hands* ,1949 *Air Battle for Leningrad* Dmitry Degtev,Dmitry Zubov,2023-11-09 This book examines the full story of the German and Soviet aerial battles in the Leningrad sector during the siege The Siege of Leningrad was one of the most brutal battles of the Second World War The second largest and most populous city in the Soviet Union Leningrad now St Petersburg was one of the three priority targets of the German invasion Operation Barbarossa A total of 333 large military factories were concentrated in Leningrad and accordingly 565 000 workers lived there producing tanks aircraft artillery and warships On 10 July 1941 German tank divisions having broken through the front south of the city of Pskov reached the town of Luga From there Hitler's forces had just over 110 miles to go to Leningrad Meanwhile the city was feverishly preparing for defense Stalin's deputies Zhdanov and Voroshilov planned to use the entire combat ready population of Leningrad for that purpose Believing that the city would soon be captured by the Germans Stalin ordered the immediate evacuation of military factories and skilled workers from Leningrad to the East Before the city was completely blockaded

most of the valuable equipment had been removed. However, the remaining civilian population, including about 400,000 children, were left to their fate. In early September 1941, German divisions supported by the Luftwaffe's VIII Fliegerkorps captured the town of Shlisselburg. Leningrad was now cut off from the rest of the Soviet Union. Hitler believed that the city would soon echo to the sound of German jackboots. Leningrad, however, did not give up. In the autumn of 1941, the Wehrmacht did not have enough forces to take the city, and for three long years the main means of fighting its defenders were the Luftwaffe and long range artillery. In September 1941, when the systematic bombing and shelling began, many thousands of families tried to leave Leningrad, but nearly all of the escape routes were cut off. Food supplies in the city sharply decreased. In this book, the authors explore the full story of the German and Soviet aerial battles in the Leningrad sector during the siege. There are devastating details of the bombing of the starving population, numerous attempts by the Luftwaffe to destroy the Red Baltic Fleet, and air attacks against the Road of Life, along which vital food and ammunition were delivered to the city and combats in the skies over Leningrad and its surroundings. Revealing what was happening in the air and on the ground as well as in the German and Russian headquarters, the authors explain why, in spite of numerous successes, the Luftwaffe failed to help force the surrender of Leningrad.
