with inequality and oppressive structures that perpetuate structural disadvantage due to existing power disparity between dominant and unprivileged group members The book then goes on to underscore the need of constructing relational and context sensitive diversity management frameworks Overall the book outlines that current business cases for diversity focus solely on instrumental goals and tangible outcomes and as a result fail to fully capture the complexity as well as the particularity of the diversity phenomenon The book underlines the necessity for a more inclusive paradigm implying a progressive problem shift in the dominant diversity research agenda from a market driven business oriented diversity management to one highly valuing affirming and respecting otherness
