Disposal and Decontamination of Pesticides Maurice V. Kennedy, 1977 **Disposal and Decontamination of Pesticides**, 1978 **DISPOSAL AND DECONTAMINATION OF PESTICIDES- PAPERS PRESENTED AT A SYMPOSIUM- 174TH MEETING- ACS, DIVISION OF PESTICIDE CHEMISTRY.** , *Final evaluation of "Disposal of persistent organic pollutants and obsolete pesticides in Mozambique"* Food and Agriculture Organization of the United Nations, 2020-02-25 Pesticides have helped control disease and increase crop production for food security However poor management of pesticides has shown negative impacts human health and the environment including death and disability among users Of particular concern are Persistent Organic Pollutants POPs that are highly effective in the control of the insect vectors of malaria and sleeping sickness and locusts FAO supported by GEF implemented a POPs project in Mozambique to safeguard and dispose existing stocks of obsolete pesticides as well as working to reduce risk across the pesticide lifecycle at the policy level The evaluation found that the project was successful in safeguarding POPs pesticide waste and contaminated containers and had to deal with a much larger quantity of contaminated soil and obsolete pesticides than initially planned In the future the evaluation recommends that the Project Steering Committee with the support of FAO should i continue the remediation of highly contaminated sites ii establishment of a sustainable system for managing empty pesticide containers and ii establishment of a national pesticide stock management system Project code GCP MOZ 100 GFF GEF ID 3986 **Guide to Sources for Agricultural and Biological Research** J. Richard Blanchard, Lois Farrell, 2023-07-28 Decontamination of Pesticide Residues in the Environment Francis A. Gunther, 2012-12-06 That residues of pesticide and other foreign chemicals in food stuffs are of concern to everyone everywhere is amply attested by the reception accorded previous volumes of Residue Reviews and by the gratifying enthusiasm sincerity and efforts shown by all the individuals from whom manuscripts have been solicited Despite much propaganda to the contrary there can never be any serious question that pest control chemicals and food additive chemicals are essential to adequate food production manufacture marketing and storage yet without continuing surveillance and intelligent control some of those that persist in our foodstuffs could at times conceivably endanger the public health Ensuring safety in use of these many chemicals is a dynamic challenge for established ones are continually being displaced by newly developed ones more acceptable to food technologists pharmacologists toxicologists and changing pest control requirements in progressive food producing economies These matters are of genuine concern to increasing numbers of governmental agencies and legislative bodies around the world for some of these chemicals have resulted in a few mishaps from improper use Adequate safety in use evaluations of any of these chemicals persisting into our foodstuffs are not simple matters and they incorporate the considered judgments of many individuals highly trained in a variety of complex biological chemical food technological medical pharmacological and toxicological disciplines **Pesticide Disposal and Detoxification** A. Ferguson, Alfred Francois Meiners, 1975 Final evaluation of "Demonstration project for the decontamination of Persistent Organic Pesticides contaminated soils using non-thermal treatment methods" Food and Agriculture Organization of the United Nations, 2020-02-28 The pesticide story began in the 1980s with outbreaks of migratory pests including locusts Donors provided pesticides including persistent organic pollutants POPs to help control outbreaks Several storage depots were set up across the country Some of the pesticides were not used and remained in the depots where they started to leak from their containers into the soil Between 1995 and 2003 two projects collected over 300 tonnes from government storage depots and identified 42 tonnes of farmer held obsolete pesticides The stocks were taken to a warehouse in Sebele before being disposed of through high temperature incineration in 2003 From 2002 to 2012 the government started collecting empty plastic containers EPCs and obsolete stocks While the accumulation of obsolete stocks had fallen through awareness of the problem raised by these projects it was still a problem Also nothing had been done about the POPs contaminated soils left behind after the government depots had been cleared The Africa Stockpiles Program continued to raise the issue of POPs contamination 28 It was in this context that discussions began in 2008 that led to the design and funding of this Project to deal with contaminated soils and to strengthen pesticide lifecycle management to reduce accumulation of obsolete pesticides and the risk from pesticides in general The Project document identified serious gaps in Botswana's ability to control all aspects of the pesticide life cycle including the capacity to control imports gaps in pesticide and waste legislation and need for improved management of pesticide registrations
