Disputed Territoryearth:

Disputed Territories David S. Trigger, Gareth Griffiths, 2003-12-01 Disputed Territories investigates the significance of land for contesting cultural identities in comparable settler societies In the regions of Australasia and southern Africa European visions of landscape and nature have engaged with southern hemisphere environments and the cultures of indigenous peoples Amid conflicts over land as a material resource there has also been an intellectual contest over the aesthetic iconic and cultural meanings of natural forms and species Arising from a programme of seminars held at The University of Western Australia this collection of eminent international authors assembles contributions from anthropology geography history and literary studies The combination of diverse methods and theoretical approaches establishes the ways that land and nature constitute disputed territories in the mind as well as material resources subject to pragmatic negotiations

Enduring Territorial Disputes Krista E. Wiegand, 2011-09-01 Of all the issues in international relations disputes over territory are the most salient and most likely to lead to armed conflict Understanding their endurance is of paramount importance Although many states have settled their disagreements over territory seventy one disputes involving nearly 40 percent of all sovereign states remain unresolved In this study Krista E Wiegand examines why some states are willing and able to settle territorial disputes while others are not She argues that states may purposely maintain disputes over territory in order to use them as bargaining leverage in negotiations over other important unresolved issues This dual strategy of issue linkage and coercive diplomacy allows the challenger state to benefit from its territorial claim Under such conditions it has strong incentive to pursue diplomatic and militarized threats and very little incentive to settle the dispute over territory Wiegand tests her theory in four case studies three representing the major types of territorial disputes uninhabited islands and territorial waters as seen in tensions between China and Japan over the Senkaku and Diaoyu Islands inhabited tracts of territory such as the North African enclaves of Ceuta and Melilla affecting Morocco and Spain and border areas like the Shebaa Farms dispute between Lebanon and Israel A fourth case study of a dispute between China and Russia represents a combination of all three types settled in 2008 it serves as a negative example All these disputes involve areas that have key strategic and economic importance both regionally and globally

Unresolved Border, Land and Maritime Disputes in Southeast Asia Alfred Gerstl, Mária Strašáková, 2016-11-14 Unresolved Border Land and Maritime Disputes in Southeast Asia edited by Alfred Gerstl and M ria Stra kov sheds light on various unresolved and lingering territorial disputes in Southeast Asia and their reflection in current inter state relations in the region The authors academics from Europe and East Asia particularly address the territorial disputes in the South China Sea and those between Vietnam and Cambodia and Thailand and Cambodia They apply International Relations theories in a wider regional and comparative perspective The empirical analyses are embedded in a concise theoretical discussion of the principles of sovereignty territorial integrity and borders Furthermore the book discusses the role of the Association of Southeast Asian Nations ASEAN and other multi track

mechanisms in border conflict mediation Contributors are Petra And lov Alica Kizekov Filip Kraus Josef Falko Loher Padraig Lysaght J rg Thiele Richard Turcs nyi Truong Minh Vu and Zden k K

Land, Mobility, and Belonging in West Africa Carola Lentz,2013-07-05 An ethnographic study of issues of land rights property regimes and ethnicity in West Africa Focusing on an area of the savannah in northern Ghana and southwestern Burkina Faso Land Mobility and Belonging in West Africa explores how rural populations have secured contested and negotiated access to land and how they have organized their communities despite being constantly on the move as farmers or migrant laborers Carola Lentz seeks to understand how those who claim native status hold sway over others who are perceived to have come later As conflicts over land agriculture and labor have multiplied in Africa Lentz shows how politics and power play decisive roles in determining access to scarce resources and in changing notions of who belongs and who is a stranger Illuminates the distinctive historical trajectory of land claims authority and belonging among the Dagara and Sisala peoples of the Black Volta region and locates this specific case history within broader debates over transformation in access use and control over land in colonial and postcolonial Africa Sara Berry Johns Hopkins University Important in the sense that it constitutes a detailed historical study of how complex narratives of belonging and notions of property interlock It is academic work of the first order Christian Lund Roskilde University

Territorial Acquisition, Disputes and International Law Surya P. Sharma,2024-01-15 This book analyzes the traditional criteria of territorial acquisition and demonstrates their inadequacies in the modern context It also addresses contemporary territorial doctrines and conflicts It regards territorial acquisition as a comprehensive process involving various considerations leading to the establishment or transfer of exclusive control over territory This approach has many advantages and adds to the development of the law of territorial acquisition The author also provides an analysis of the claims and counter claims in major contemporary territorial disputes and suggests appropriate legal perspectives bearing upon decision making in regard to them This book will be highly useful to students academics and practitioners in the field of international law as well as all governments and institutions dealing with territorial matters

Land and the Politics of Belonging in West Africa ,2005-12-01 Recognizing that land rights are ambiguous negotiable and politically embedded these case studies explore the long term processes and recent changes in contemporary rural West Africa affecting the conversion of control over land into social and political capital and vice versa They point to the colonial origins of what came to be viewed as customary tenure and to the legal pluralism characterizing pre colonial tenure arrangements Furthermore they show the spiritual and ritual importance of land that can be converted into political power and economic prerogatives a dimension neglected by much of the recent literature Analyses cover forest and savannah state and segmentary societies facilitating comparison and insights across the Anglo Francophone divide
