## **Distant Kinships:**

**Distant Kinship** Matthias N. Lorenz, 2022-07-28 This study of Joseph Conrad's influential work *Heart of Darkness* presents for the first time the German language reception of this reference text in the debate on postcolonialism. The spectrum ranges from Conrad's contemporaries like Kafka to many canonical authors of the 20th century including Thomas Mann, Ernst Jünger, Christa Wolf to the most recent names in literature, i.e. Christian Kracht and Lukas Bärfuss. Beyond the readings of their works, the study contributes to the study of cultural transfers as well as to Conrad philology and it expands the theory of intertextuality with parameters that capture the complex factor of power in postcolonial relations.

**Hereditary genius** Sir Francis Galton, 1891      **Hereditary Genius** Francis Galton, 1870      **Hereditary Genius** Francis Galton, 2023-11-20 Reprint of the original first published in 1875      **The Gift of Kinship** Edward LiPuma, 1988

Edward LiPuma presents an ethnography of Maring social organization in order to develop a generative theory of Highland societies.      **Componential Analysis of Kinship Terminology** V. Pericliev, 2013-07-26 This book presents the first computer program automating the task of componential analysis of kinship vocabularies. The book examines the program in relation to two basic problems: the commonly occurring inconsistency of componential models and the huge number of alternative componential models.

**Genealogies of Connecticut Families** Judith McGhan, 1983      **Kinship, Ecology and History** Laurent Dousset, Sejin Park, Georges Guille-Escuret, 2019-12-12 The analysis of kinship plays a major role in social anthropology. However, the intellectual triumph of structuralism has transformed this analysis into an ivory tower, and the methodological hegemony of functionalism inhibits any historical authority. *Kinship Ecology and History* informs the reader of these old yet long-lasting issues. By presenting new original perspectives, this book reinvents the manner in which we can study kinship. It also examines ecology and history as a conjectural reflection which makes up the foundations on which human kinship can be reflected upon. Whether human kinship is understood in the form of systematics models or as articulated practices, it has to be conceived as a strategic means for modes of action and of transformation of life in society. The three case studies presented in this book give body to new issues. They deconstruct the existing models in order to re-establish kinship as a condition and consequence of social evolution.      **The Metamorphoses of Kinship** Maurice Godelier, 2012-03-03 With marriage in decline, divorce on the rise, the demise of the nuclear family and the increase in marriages and adoptions among same-sex partners, it is clear that the structures of kinship in the modern West are in a state of flux. In *The Metamorphoses of Kinship*, the world-renowned anthropologist Maurice Godelier contextualizes these developments, surveying the accumulated experience of humanity with regard to such phenomena as the organization of lines of descent, sexuality and sexual prohibitions. In parallel, Godelier studies the evolution of Western conjugal and familial traditions from their roots in the nineteenth century to the present. The conclusion he draws is that it is never the case that a man and a woman are sufficient on their own to raise a child, and nowhere are relations of kinship or the family the keystone of society.

Godelier argues that the changes of the last thirty years do not herald the disappearance or death agony of kinship but rather its remarkable metamorphosis one that ironically is bringing us closer to the traditional societies studied by ethnologists

Family and Kinship in Europe Marianne Gullestad, Martine Segalen, 1997-01-01 This collection of essays considers the current significance of kinship in various Western European countries along with manifestations of its cultural diversity How do nations vary in the value they attribute to the family in this wider sense How do the different generations communicate with one another In what ways have questions relating to the legacy of the past and to the role of memory been rehabilitated in order for the continuity of the family to be assured This book declines to accept predictions made on the basis of a common population projection that European family life will display a common pattern Further across a comparison of a number of case studies it points to a degree of diversity in European family values as revealed when one looks closely at the ways in which these values are transmitted **Napoleon and the fair sex, tr. from the French** Frédéric Masson, 1894

**Napoleon And The Fair Sex** William Heinemann, 1894 **Reincarnation** Edward Dwight Walker, 1888 **De Gruyter Handbook of Business Families** Michael Carney, Marleen Dieleman, 2023-01-30 The management field increasingly recognizes that most firms in the world are family firms and that these entities operate differently from the non family firms on which most of our current management theories are based The De Gruyter Handbook of Business Families brings together work from leading academics who explore emerging research themes relevant to business families particularly drawing in new insights from adjacent disciplines that can advance the family business field The handbook challenges the traditional notion of the single firm single family that has characterized most early research on family business Recognizing that families may simultaneously own or control multiple businesses as well as substantial wealth beyond these firms in the form of financial and non financial assets this handbook focuses on business families rather than the narrower construct of family business The contributions in this handbook explore the relatively neglected dynamics between individuals with family ties that shape the interaction between family and business business families with multiple businesses how business families adopt formal rules and processes around their joint activities and the institutionalization of wealth and business families in society The De Gruyter Handbook of Business Families fills a gap in the family business research literature and is an essential reference work for researchers and graduate level students in the area of business families Maintaining Long-Distance and Cross-Residential Relationships Laura Stafford, 2004-12-13 This thought provoking volume offers an innovative and intriguing approach to the study of long distance relationships Author Laura Stafford examines romantic long distance relationships and then expands the conception of long distance relationships to include other relational types She summarizes literature across the social sciences on various types of long distance relationships and extracts themes and patterns across the relational types In so doing she reconsiders approaches to and offers an expanded vision of relational maintenance By expanding her scope beyond romantic relationships Stafford includes

those that span residences and relational types such as noncustodial parent child and geographically and residentially separated adult children and parents She contends that face to face interaction is not necessary to maintain healthy relationships and questions the assumption that maintaining rather than terminating a particular relationship is always best for the involved parties With its interdisciplinary approach to challenging commonly held assumptions about communication and close relationships *Maintaining Long Distance and Cross Residential Relationships* will be engaging reading for scholars in communication psychology sociology mass communication and family studies It is also appropriate for special topics graduate courses on long distance relationships and human communication and will serve as a unique supplemental text for upper level undergraduate and graduate students in interpersonal relational and family communication and family studies

**Star of the Magi**, 1899 *Noteworthy Families* Francis Galton, Edgar Schuster, 2023-08-22 *Noteworthy Families* stands as a seminal collection rooted in the nascent field of eugenics a movement that significantly influenced the late 19th and early 20th centuries The anthology navigates through the biographical sketches of notable families to explore the hereditary aspects of genius thereby providing a diverse array of literary styles ranging from the analytical to the narratively engaging It is notable for its attempt to blend scientific inquiry with literary exposition thereby occupying a unique place in the annals of both scientific and literary history The diversity within the collection reflects a broader discourse on heredity versus environment making it a significant piece for scholars and enthusiasts alike Francis Galton and Edgar Schuster's collaborative effort in *Noteworthy Families* brings together a range of intellectual achievements and hypotheses that shaped the early discourse on genetic inheritance and eugenics Their backgrounds Galton as a polymath influential in the development of early psychological testing and statistics and Schuster's contributions to genetics mirror the collection's foundational premise Aligning with both the historical context and the scientific zeitgeist of their times their work exemplifies the interdisciplinary approach that marked much of early genetic research The anthology thus offers a fascinating glimpse into the historical and cultural dynamics that informed early 20th century scientific investigation This collection is essential for anyone interested in the intersections of literature history and science It offers an unparalleled window into the early conversations surrounding genetics eugenics and the legacy of intellectual achievement Furthermore *Noteworthy Families* invites readers to critically engage with the ideas presented fostering a deeper understanding of how scientific beliefs are influenced by and reflect their social and historical contexts For scholars students and general readers alike this anthology serves not only as a compendium of influential familial legacies but also as a testament to the evolving discourse on heredity and genius
