Gratuitous Suffering and the Problem of Evil Bryan Frances, 2013 Suffering that is not coupled with any redeeming good is one of our world's more troubling apparent glitches. It is particularly vexing for any theist who believes that the world was created by a supremely morally good knowledgeable and powerful god. *Gratuitous Suffering and the Problem of Evil: A Comprehensive Introduction* is among the first book-length discussions of theistic approaches to this issue. Bryan Frances's lucid and jargon-free analyses of a variety of possible responses to the problem of gratuitous suffering will provide serious students or general readers much material with which to begin an extended contemplation of this ancient and contemporary concern. The perfect size and scope for an introductory philosophy class's discussion of the problem of evil and suffering and deliberately crafted to be approachable by all interested readers, *Gratuitous Suffering and the Problem of Evil* is philosophy doing what it does best: serious engaged rigorous explorations of even the darkest truths. The book offers many useful pedagogical features including chapter overviews and summaries, annotated suggested readings, and eight discussion questions.

The Christian Library: Memoir of the Rev. Robert Hall, 1833 **The Discovery of the Force which in the Beginning Put All the Heavens and the Earth in Motion** Jacob Ennis, 1871 **The Starry Hosts: A Plea for the Habitation of the Planets** Joseph Hamilton, 2024-01-31 Reprint of the original first published in 1875 *A Mathematical Geography* Edward Payson Jackson, 1872 **The Argus Almanac**, 1890 *The soul in nature*, tr. by L. and J.B. Horner Hans Christian Ørsted, 1852 *Life on Other Worlds* Steven J. Dick, 2001-03-19 The recent discoveries of extrasolar planets and possible microfossils in Martian meteorite ALH 84001 are only the latest developments in a debate that spans millennia and that has been especially heated in the twentieth century. From the furore over Percival Lowell's claim of canals on Mars at the beginning of the century to the biological experiments of the Viking spacecraft, the controversial Mars rock, and the sophisticated Search for Extraterrestrial Intelligence (SETI) at its end, otherworldly life has often titillated and occasionally consumed science and the public. So too have crucially related areas such as the search for planetary systems, the quest for an explanation of UFOs, and inquiries into the origin of life. The theme has been elaborated in science fiction from H.G. Wells to Arthur C. Clarke and resulted in some of the most popular films of all time including *ET: The Extra-Terrestrial*, *Independence Day*, and *Contact*. *Life on Other Worlds* details in a readable and non-technical manner the history of the twentieth-century extraterrestrial life debate, one of the pervasive themes of our century.
