## **Distilling Knowledge Alchemy Chemistry And The Scientific Revolution:**

*Distilling Knowledge* Bruce T. Moran, 2006-09-01 The metaphor of the Scientific Revolution Moran argues can be expanded to make sense of alchemy and other so called pseudo sciences by including a new framework in which process can count as an object in which making leads to learning and in which the messiness of conflict leads to discernment

**Alchemy and Authority in the Holy Roman Empire** Tara Nummedal, 2008-09-15 What distinguished the true alchemist from the fraud This question animated the lives and labors of the common men and occasionally women who made a living as alchemists in the sixteenth and seventeenth century Holy Roman Empire As purveyors of practical techniques inventions and cures these entrepreneurs were prized by princely patrons who relied upon alchemists to bolster their political fortunes At the same time satirists artists and other commentators used the figure of the alchemist as a symbol for Europe's social and economic ills Drawing on criminal trial records contracts laboratory inventories satires and vernacular alchemical treatises *Alchemy and Authority in the Holy Roman Empire* situates the everyday alchemists largely invisible to modern scholars until now at the center of the development of early modern science and commerce Reconstructing the workaday world of entrepreneurial alchemists Tara Nummedal shows how allegations of fraud shaped their practices and prospects These debates not only reveal enormously diverse understandings of what the real alchemy was and who could practice it they also connect a set of little known practitioners to the largest questions about commerce trust and intellectual authority in early modern Europe

**The Alchemical Harry Potter** Anne J. Mamary, 2021-01-05 When Harry Potter first boards the Hogwarts Express he journeys to a world which Rowling says has alchemy as its internal logic The Philosopher's Stone known for its power to transform base metals into gold and to give immortality to its maker is the subject of the conflict between Harry and Voldemort in the first book of the series But alchemy is not about money or eternal life it is much more about the transformations of desire of power and of people through love Harry's equally remarkable and ordinary power to love leads to his desire to find but not use the Philosopher's Stone at the start of the series and his wish to end the destructive power of the Elder Wand at the end This collection of essays on alchemical symbolism and

transformations in Rowling's series demonstrates how Harry's work with magical objects, people and creatures transfigure desire, power and identity. As Harry's leaden existence on Privet Drive is transformed in the company of his friends and teachers, the Harry Potter novels have transformed millions of readers, inspiring us to find the gold in our ordinary lives.

The Poesy of Scientia in Early Modern England Subha Mukherji, Elizabeth L. Swann, 2024-07-12. This book explores interconnections between the modes of knowing that we now associate with the rubrics literature and science at a formative point in their early development. Rather than simply tracing lines of influence, it focuses on how both literary texts and natural philosophy engage with materiality, language, affect and form. Some essays are invested in how early modern science adopts and actively experiments with rhetorical and poetic modes and expression, while others emphasize a shared investment in natural philosophical topics: alchemy, chance or astrology, for example. That move among the period's observational texts and its literature, highlighting the participation of literary texts in the production of experimental knowledge. Organised around the broad themes of creation and transformation, mediation and communication, and interpretation and imaginative speculation, the essays collectively probe the presumed dichotomy between science's schematizing and taxonomic ambitions and the fertile and volatile creative energies of literary texts.

**Mercantilism Reimagined** Philip J. Stern, Carl Wennerlind, 2014. This volume of collected essays takes a new approach to this problematic subject by rethinking its broad foundations. From a variety of perspectives, its authors situate mercantilism against the backdrop of wider transformations in seventeenth-century Britain, Europe and the Atlantic, from the scientific revolution to the expansion of empire.

**Silver by Fire, Silver by Mercury: A Chemical History of Silver Refining in New Spain and Mexico, 16th to 19th Centuries** Saul Guerrero, 2017-09-11. In *Silver by Fire, Silver by Mercury: A Chemical History of Silver Refining in New Spain and Mexico, 16th to 19th Centuries*, Saul Guerrero combines historical research with geology and chemistry to refute the current prevailing narrative of a primitive effort dominated by mercury and its copious emissions to the air. Based on quantitative historical data, visual records and geochemical fundamentals, Guerrero analyses the chemical and economic reasons why two refining processes had to share production, creating along the way major innovations in the chemical recipes, milling equipment, mercury recycling practice and industrial architecture and operations. Their main environmental impact was lead fume and the depletion of woodlands from smelting and the transformation of mercury into calomel during the patio process.

connection to surrounding lands and their cultures The essays in this volume illuminate this expansive view of cooking and aspire to show how the kitchen's inner workings prove tightly though often invisibly interwoven with local national and increasingly global surroundings Engaging with literary and historical methodologies including close reading recipe analysis and perspectives on gender class race and colonialism we begin to develop a shared theoretical and practical language for the art of cooking that combines the physical with the intellectual the local with the global and the domestic with the political
