

My experiences with diversity supplements

- Experience as a recipient, principal investigator, and matchmaker
 - Masters-level supplement for degree program with stipend (tuition benefits vary across unit)
 - Faculty-level supplement in first years of junior faculty- high % effort
 - Principal investigator/Co-I for several masters and doctoral trainees
- Diversity supplements are intended to expose and encourage diverse candidates to pursue research careers
- For student trainees supplements:
 - Principal investigator must do the heavy lifting of developing the aims and writing the proposal
 - The scope of the project should be appropriate for the level of trainee (examples) and benefit to trainee's professional development
 - High school/undergrad- data collection activities, literature reviews
 - Masters- data collection activities, analysis of existing data for questions that are not the main aims of the parent grant
 - Doctoral- adding data (medical records, spatial or survey data) to the parent grant, analysis of existing data, tuition benefits
 - Post-doctoral/Faculty- original data collection (interviews, focus groups, additional surveys), professional development

The CURE Paradigm Center to Reduce Cancer Health Disparities (U.S.),2011 **Word and Supplement** Timothy Ward,2002 What are Christians saying when they call the Bible the Word of God How is that statement to be understood in relation to postmodernity s suspicion of meaning Word and Supplement tackles these questions by bringing post modern theory into critical dialogue with the often neglected doctrine of the sufficiency of Scripture The notion of the sufficiency of a text and the contrasting idea of the supplement s which texts carry with them together provide a sharp critical tool for analysing a variety of contemporary hermeneutical and doctrinal positions Brought into this discussion are Derrida from whom the idea of supplement is borrowed Barth Frei Fish Hirsch Hauerwas Gadamer Bakhtin Fowl Wolterstorff Vanhoozer Childs and Warfield Building especially on descriptions of language as action Word and Supplement critically reconstructs the sufficiency of Scripture as both a concept and a doctrine which must remain central to Christian theology and practice

Dietary Supplements of Plant Origin Massimo Maffei,2003-05-22 Dietary supplements are estimated to be used regularly by almost 60% of the American population and over 300 million people worldwide An important and ever growing portion of this market is in botanical supplements that are derived from natural plants Natural however does not necessarily mean safe and although plants can provide health essential and health improving nutrients they can also provide toxic compounds While the use and sales of botanical supplements continues to expand rapidly scientific understanding of the efficacy and safety of these products remains limited The aim of Dietary Supplements of Plant Origin is to give both the general and specialized reader a comprehensive insight into the most recent findings in this interesting area of dietary supplementation It is hoped that this book will shed a new light on this topic and impact positively upon the health of people in this new millennium *Celebrating Our Nation's Diversity* United States. Bureau of the Census,1995 *Dietary and Supplement Strategies for the Prevention and Treatment of Metabolic Syndrome* Rahele Ziaei,Jose Atilio Canas,Zahra Hajhashemy,Matteo Della Porta,Sahar Foshati,2024-12-16 Metabolic syndrome MetS afflicts about 20 30 % of the global population and is increasing in prevalence and incidence MetS is linked to an unhealthy lifestyle e g low physical activity and unbalanced and western style diets which leads to a low grade inflammatory state and an increase in oxidative stress due to an unbalanced ratio of pro oxidants and antioxidant species in the human body This low grade inflammatory state triggers cytokine hypersecretion and eventually leads to insulin resistance which aggravates the major components of this syndrome such as hypertension dyslipidemia and abdominal obesity in a vicious cycle This is a critical clinical problem because it leads the patient to have a greater risk of developing type 2 diabetes with progression to cerebrovascular and endothelial pathologies **The Next Generation of Biomedical and Behavioral Sciences Researchers** National Academies of Sciences, Engineering, and Medicine,Policy and Global Affairs,Board on Higher Education and Workforce,Committee on the Next Generation Initiative,2018-07-18 Since the end of the Second World War the United States has developed the world s

preeminent system for biomedical research one that has given rise to revolutionary medical advances as well as a dynamic and innovative business sector generating high quality jobs and powering economic output and exports for the U S economy However there is a growing concern that the biomedical research enterprise is beset by several core challenges that undercut its vitality promise and productivity and that could diminish its critical role in the nation s health and innovation in the biomedical industry Among the most salient of these challenges is the gulf between the burgeoning number of scientists qualified to participate in this system as academic researchers and the elusive opportunities to establish long term research careers in academia The patchwork of measures to address the challenges facing young scientists that has emerged over the years has allowed the U S biomedical enterprise to continue to make significant scientific and medical advances These measures however have not resolved the structural vulnerabilities in the system and in some cases come at a great opportunity cost for young scientists These unresolved issues could diminish the nation s ability to recruit the best minds from all sectors of the U S population to careers in biomedical research and raise concerns about a system that may favor increasingly conservative research proposals over high risk innovative ideas The Next Generation of Biomedical and Behavioral Sciences Researchers Breaking Through evaluates the factors that influence transitions into independent research careers in the biomedical and behavioral sciences and offers recommendations to improve those transitions These recommendations chart a path to a biomedical research enterprise that is competitive rigorous fair dynamic and can attract the best minds from across the country

Winning Grants Sean Ekins,2023-06-12 As an academic or a small business owner you will need to write grants at some point in your career Writing them though is not enough what you also need to know is how to win grants Much has been written about writing grants the mysterious special ability called grantsmanship so it occurred to me that there is a need to come at this differently and spill the beans The difficulty in getting a grant in particular an NIH grant like an R01 in the USA is often described it is competitive and gets tougher every year Your proposal therefore must stand out it must connect with the reviewers This is true for all types of grants give the reviewer what they want always But also you need to connect to the program officer the committee that ultimately makes funding decisions and you must take care of a myriad of other details outside of the main event which is describing the science This means you cannot rely on just out writing the competition it is more than that as you have to out think out strategize and out schmooze them If you have been continually funded for decades that is terrific but if you want to keep being funded there is no guarantee what got you there will keep you there What was a hot technology 4 5 years ago is not the new thing anymore you will need to do something different but what You therefore need to not only think about writing great grants you need to put it into practice and win them Having written and won grants from the NIH and DOD over the past 17 years and longer by the time you read this I possess a valuable perspective Each grant and study section will be different Whether a big or small grant it does not

seem to make a difference the reviewers will critique your efforts they may not like it they may reject your ideas or they may love it You have some small degree of control until the proposal leaves your hands or more correctly you click submit You will need to differentiate your grant from the hundreds of others in many ways but you cannot change who you are your history so how you describe yourself and team will also have an impact You could spend hundreds of hours on your proposal or just a day and the outcome might still be the same This small book is a summary of my own personal experiences and will provide some advice that will help you learn how to do a better job of winning grants This book is written by a scientist who writes the grants and develops commercial products Provides a unique perspective on what you need to write better grants Teaches you how to continually win grants This book provides examples from the authors own grant applications The reader will be inspired to start a company to win small business grants *Child Health Equity, An Issue of Pediatric Clinics of North America, E-Book* Robert S. Cultural Education - Cultural Sustainability Zvi Bekerman,Ezra Kopelowitz,2008-02-06 This volume is a path breaking contribution to the study of efforts of diaspora indigenous and minority groups broadly defined to use education formal and informal to sustain cultural continuity while grappling with the influences and demands of wider globalizing nationalizing or other homogenizing and assimilatory forces Particular attention is given to groups that use educational elements other than second language teaching alone in programs to sustain their particular cultural traditions The focus of the book on cultural sustainability changes the nature of questions posed in multicultural education from those that address

the opening of boundaries to issues of preserving boundaries in an open yet sustainable way As forced and elective immigration trends are changing the composition of societies and the educational systems within them bringing a rich diversity of cultural experience to the teaching learning process diaspora indigenous and minority groups are looking more and more for ways to sustain their cultures in the context of wider socio political influences This volume is a first opportunity to consider critically multicultural efforts in dialogue with educational options that are culturally particularistic but at the same time tolerant Academics will find this an excellent reference book Practitioners will draw inspiration in learning of others efforts to sustain cultures and will engage in critical reflection on their own work vis vis that of others Teachers will realize they do not stand alone in their educational efforts and will uncover new strategies and methodologies through which to approach their work
