Dividing Reality:

Dividing Reality Eli Hirsch, 1993-04-29 Why does our language divide up reality one way rather than another On what rational basis does our language contain certain kinds of general words rather than others Hirsch shows that a language can be constructed which describes reality in ways we would find absurdly irrational for example by classifying normally disparate items under the same general term The apparent irrationality of the new language does not depend on its impoverished fact stating power as this may be equivalent to the fact stating power of ordinary language the problem then is to explain exactly what is wrong with it Various options are explored and criticized such as the hypothesis that language must reflect an underlying objective distinction between natural kinds that there are pragmatic reasons for the way language functions as it does and that as a matter of metaphysical necessity strange ways of dividing up reality are constructions out of ordinary ways Having demonstrated that this newly identified problem is in fact a serious one which cannot be easily solved or brushed aside Hirsch offers his own suggestions for a possible solution *Psychodrama, Surplus Reality and the Art of Healing* Zerka T. Moreno, Leif Dag Blomkvist, Thomas Rutzel, 2013-01-11 The practice of psychodrama allows participants to create a world for themselves free of usual rules and constraints This freedom from all ordinary conventions is what Moreno called Surplus Reality and is one of the most vital curative and mysterious elements of psychodrama In this book Leif Dag Blomkvist and Zerka Moreno explore the depths of this long neglected concept In addition each chapter is prefaced by Leif Dag Blomkvist's explanations and illuminations of the forces and energies from early religious rituals and festivals to the art of Surrealism which have influenced psychodrama Psychodramatists and mental health professionals who wish to take therapy beyond the verbal will find the book valuable reading [Realism and Antirealism](#) William P. Alston, 2018-08-06 Throughout the past century a debate has raged over the thesis of realism and its alternatives Realism the seemingly commonsensical view that all or most of what we encounter in the world exists and is what it is independently of human thought has been vigorously denied by such prominent intellectuals as Jacques Derrida Michel Foucault Richard Rorty Thomas Kuhn Hilary Putnam and Nelson Goodman The opponents of realism among them historians and social scientists who support social constructionism hold that all or most of reality depends on human conceptual schemes and beliefs In this volume of original essays a group of philosophers explores the ongoing controversy The book opens with an introduction by William P Alston whose writing on the subject has been widely influential Selected essays then compare and contrast aspects of the arguments put forward by the realists with those of the antirealists Other chapters discuss the importance of the debate for philosophical topics such as epistemology and for domains ranging from religion literature and science to morality

[Unified Reality Theory](#) Steven Kaufman, 2015-12-04 Unified Reality Theory demonstrates that the source of reality is a universal consciousness and that we are in no way separable from that source and so in no way truly separable from each other or any other aspect of reality I recommend this book to anyone interested in understanding the nature of reality and

their place in it Deepak Chopra Unified Reality Theory describes how all reality evolves from an absolute existence It also demonstrates that this absolute existence must have consciousness as an attribute that s intrinsic to its being Thus Unified Reality Theory shows that consciousness rather than being a product of the evolution of physical reality is itself the source of what we experience as physical reality and that physical reality is itself but one aspect of an evolving universal consciousness Unified Reality Theory shows that most fundamentally this absolute consciousness existence evolves into reality by means of a single process self relation That is consciousness existence becomes reality by forming relationships with itself analogous in a very limited way to what happens to a rubber band that s twisted upon itself i e it remains whole while differentiating into other forms Thus Unified Reality Theory demonstrates that reality is a state of existential self relation The idea that the universe consists of existence which has formed relationships with itself isn t new Taoists have understood this idea for at least a couple of thousand years What s new here is the presentation of this idea in the form of a detailed and defined structural model that correlates with the behavior of physical reality as described by science in general and physics in particular Ultimately Unified Reality Theory uses science and logic to make the case that God exists as a pervasive and absolute consciousness that transcends the realities of space and time and that we as well as everything else are that

Systemic Management Charles W. Fowler,2009-03-26 Systemic management describes a holistic objective and universally applicable form of management providing a framework for addressing environmental challenges such as global warming emergent diseases deforestation overpopulation the extinction crisis pollution over fishing and habitat destruction Its goals are the consistently sustainable relationships between humans and ecosystems between humans and other species and between humans and the biosphere This book presents a convincing argument that these goals and the means to achieve them can be inferred from empirical information It describes how comparisons between humans and other species reveal patterns that can serve to guide management toward true sustainability i e ways that are empirically observed to work in natural systems This objective approach has rarely been possible in conventional management because sustainability is invariably undermined by conflicting human values Systemic management is presented as a specialized process of pattern based decision making that avoids the inconsistency subjectivity and error in current management practice It clearly demonstrates how mimicking nature s empirical examples of sustainability can circumvent anthropocentric tendencies to overuse misuse human values in management and illustrates the science best suited for achieving sustainability through examples of research that address specific management questions

Authoritarian Temptations and Right-Wing Threat Alliance Wilhelm Heitmeyer,2024-06-25 This book by noted German sociologist Wilhelm Heitmeyer analyses capitalist development in Western Europe with a focus on Germany since the 1990s and its consequences for open society and liberal democracy Following Heitmeyer s long term interest in extremism this book highlights two main threads of discussion the causes and distribution of authoritarian tendencies and the processes and steps of escalation of these

tendencies through right wing alliances It critically views capitalism and capitalist governance in times of crises against problems of political representation and the devaluation of certain groups It looks at a broad spectrum of attitudes in the population on the bases of a representative longitudinal study called group focused enmity Using the model of a concentric escalation continuum this book also analyses the steps of differentiation and dynamization of the right wing spectrum in the process of development of successful right wing alliances Heitmeyer meticulously studies how violent processes escalate and increases as a danger for the open society and liberal democracy especially in times of crisis and unsecured future The book has important gleanings for anyone seeking to understand and address extremism and political alienation in societies today

Approaches to the Theory of Freedom in Sor Juana Inés de la Cruz Virginia Aspe Armella, 2018-05-06 Virginia Aspe s erudite *Approaches to the Theory of Freedom* offers a new interpretation of *Primer Sueno* probably the highest Spanish written poem written by the nun Sor Juana Inés de la Cruz Aspe considers the philosophical and theological influences regarding Sor Juana s development of her concept and ideal of freedom With vast erudition Aspe helps advance the field of Sor Juana studies beyond what Paz was able to accomplish She emphasises the influence of the Jesuit theology of the University of Coimbra New perspectives and references available to the Spanish speaking world such as the recent translation of several previously unknown Latin texts from Sor Juana s Mexican contemporaries provide insights that help Aspe take our understanding of the poem further and cast new lights on her idea of freedom as well as her background and references *Approaches to the Theory of Freedom* help us to become familiar with the way this magnificent poem becomes a defense of freedom That is why this book means a significant contribution to our understanding of Sor Juana s thought and the poetry of Sor Juana s period

This Is Our Faith Rausch, Thomas P., SJ, 2024 *This Is Our Faith* offers a concise outline of the Catholic faith based on the Apostles Creed This new edition provides more recent developments of the church as it has developed through the Second Vatican Council and the vision of subsequent popes The book concludes with an important chapter on the challenges of living in a global society with multiple religions and cultures that the church must embrace to be significant throughout the twenty first century

Dietrich Bonhoeffer and Arnold Koster Paul Spanring, 2014-09-25 Baptists and Lutherans often define the tension of being in the world but not in terms of two separate realms the kingdom of God and the kingdom of the world However their understanding of these realms and their delicate connection is quite nuanced Within the Lutheran tradition the two kingdoms are held in tension which in turn leads to a precarious interaction of state and church In the Anabaptist tradition a much stricter duality is emphasised resulting in a more radical and separatist stance Dietrich Bonhoeffer and Arnold Koster analyses and compares the historical development of these two viewpoints and to discover how these traditions represented in the lives of two individual followers responded to the ideological onslaught of neopaganism and the enforced political conformity of the Third Reich Compared with Dietrich Bonhoeffer little is known of the Baptist preacher Arnold Koster His ministry as a pastor of the Baptist church in Vienna lasted from 1928-1960 During the

Nazi regime he consistently preached critically and prophetically against its underlying ideology The Kingdom of the Blind D. L. Lamperd,2024-04-22 The Kingdom of the Blind is a profound exploration into the depths of spiritual awakening and the transformative journey toward enlightenment Presented as a compelling Discourse this non fiction book serves as an essential guide for those embarking on the sacred path of inner discovery The author delves into the intricate process of spiritual transformation shedding light on the inevitable suffering that accompanies the shedding of the ego and the embrace of a higher state of consciousness As humanity enters the new astrological Age of Aquarius since 2012 the veil over ancient secret wisdom is being lifted making what was once accessible to only a select few available to all This book is a beacon for initiates offering them a gateway to the teachings of spiritual masters and the hidden mysteries that underpin the true essence of life Readers are invited to journey beyond the limitations of ego based thought systems toward the realm of superconsciousness a state of being that promises a profound connection with the universe and an unparalleled understanding of existence Throughout this Discourse the reader is offered the tools to navigate the path to enlightenment armed with the knowledge to understand the cause of their suffering and the means to transcend it This book is not merely a guide it is a companion for anyone seeking to elevate their consciousness and discover the spiritual significance of their journey through life Whether you are a seasoned seeker or new to the path this book holds the potential to illuminate your way toward spiritual fulfillment and the realization of your highest self Unicist Business Objects Building Peter Belohlavek,Diego Belohlavek,2011-07 These books were written as consultation books to be used to solve problems They are essentially analogous to medical books for individuals who decided to manage the concepts and fundamentals of things in order to manage the root causes of problems Unicist Business Objects are adaptive systems that are designed to produce a predefined result in a process By definition they deal with the adaptive aspects of businesses There are five types of business objects which are the drivers the entropy inhibitors the inhibitors the catalysts and the gravitational objects Liberating Faith Geoffrey B. Kelly,2002-12-11 Liberating Faith remains an effective introduction to the theology and spirituality of Dietrich Bonhoeffer After a brief biographical portrait of Bonhoeffer s adult life Kelly offers a thematic overview of Bonhoeffer s Christological theology with an emphasis on the sociality of Christ Other chapters focus on the liberation of faith which is essentially Bonhoeffer s theology of revelation that emerged from his own existential crisis regarding his own faith and an examination of his theology of the Church While Kelly draws heavily on Bonhoeffer s later writings like The Cost of Discipleship Ethics and especially Letters and Papers from Prison he also uses key texts spanning the entirety of Bonhoeffer s career to develop the critical ideas at the heart of Bonhoeffer s theology Therefore Liberating Faith does very well to set the stage for Bonhoeffer s overall theology Unicist Business Strategy Peter Belohlavek,2011-07 These books were written as consultation books to be used to solve problems They are essentially analogous to medical books for individuals who decided to manage the concepts and fundamentals of things in order to manage the root causes of problems

The purpose of a business strategy is to influence the market and the environment to achieve business goals The unicist approach defines that a strategic approach includes both a maximal strategy and a minimum strategy to adapt to the market and the environment Unicist Human Capital Building , **Radical Discipleship** Robert P. Vande Kappelle,2022-08-11

Discipleship is a universal experience all human beings share In our lifetime each of us has had a mentor tutor teacher or role model someone we admired respected and followed As the central character in the Bible the world s best selling book Jesus is known and revered the world over What would it be like to be mentored by such an individual Of course we can follow the accounts of the historical Jesus and his disciples in the gospels but what would it mean to be discipled by a contemporary twenty first century Jesus While people across the world claim to follow Jesus what would it mean to live in the modern world guided by a modern Jesus on religious issues such as faith God and scripture and on social issues such as poverty healthcare social justice political reform and caring for the environment A good place to begin is with compassion for Christianity and compassion are largely linked To be apprenticed to Jesus is to follow one whose profound love for the hungry sick and dying inspired more compassion than any single person movement or force in history Addressing discipleship as a priority in our lives Radical Discipleship illustrates its subject with stories and accounts of ordinary Christians living out their discipleship in authentic and inspiring ways Useful for individual or group study this volume serves as a resource for people seeking tools necessary to fulfill Jesus vision for a more vibrant and equitable world one in which every human being can thrive **The Topological Model of Genome and Evolution** Pradeep Chhaya,2023-09-19 This book deals with the missing link in the domain of functional genomics viz genomic architecture It begins with a deconstruction of the Darwinian paradigm using the proposed model of modified involuted manifolds It recasts the process of natural selection as a process of information transfer Using a topological model this book outlines a new genomic architecture The key argument for this proposed model is that some such structuralism has always been implicit in genomics The proposed model fits very well with the known genomic characteristics and allows to separate the regulatory genome from the transcriptive genomes The model is capable of discerning modular architecture of genomes with different genomic functionalities existing in hierarchical relationships and demonstrates that genomes act as units of selection and as the environment for the individual genes which act as competing species Towards the end the book also examines the role of genomic evolution in cancer and the principles of natural selection and evolution of the genotype The regulatory genome is also discussed with an emphasis on its evolution and natural selection It is a valuable source for researchers working in functional genomics mathematical modeling in biology and evolutionary genomics The Ontogenesis of Knowledge Acquisition Peter Belohlavek,2011-07 These books were written as consultation books to be used to solve problems They are essentially analogous to medical books for individuals who decided to manage the concepts and fundamentals of things in order to manage the root causes of problems When we talk about the ontogenesis of knowledge acquisition we mean the natural steps that need to be considered when

learning or when a learning process for other is being designed Knowledge can only be acquired when individuals have made a conscious decision to learn something

Unicist Business Diagnostics Peter Belohlavek, 2011-07 These books were written as consultation books to be used to solve problems They are essentially analogous to medical books for individuals who decided to manage the concepts and fundamentals of things in order to manage the root causes of problems The unicist technology for diagnostics approaches problems based on their nature Problems turn complex when results must be achieved and require a high accuracy of the diagnoses prognoses and action plans to solve them Unicist technologies for diagnostics were developed to ensure results

Complexity Science Peter Belohlavek, 2011-07 These books were written as consultation books to be used to solve problems They are essentially analogous to medical books for individuals who decided to manage the concepts and fundamentals of things in order to manage the root causes of problems Complexity Sciences deal with the research of adaptive systems and environments The unicist approach to complexity sciences implies the discovery of the ontological structure of a reality and the objects that integrate it defining the ontological algorithm and then the actions that can be done to influence such reality
