Buddhist Magic Sam van Schaik, 2020-07-28 A fascinating exploration of the role that magic has played in the history of Buddhism As far back as we can see in the historical record Buddhist monks and nuns have offered services including healing divination rain making aggressive magic and love magic to local clients Studying this history scholar Sam van Schaik concludes that magic and healing have played a key role in Buddhism's flourishing yet they have rarely been studied in academic circles or by Western practitioners The exclusion of magical practices and powers from most discussions of Buddhism in the modern era can be seen as part of the appropriation of Buddhism by Westerners as well as an effect of modernization movements within Asian Buddhism However if we are to understand the way Buddhism has worked in the past the way it still works now in many societies and the way it can work in the future we need to examine these overlooked aspects of Buddhist practice In *Buddhist Magic* van Schaik takes a book of spells and rituals one of the earliest that has survived from the Silk Road site of Dunhuang as the key reference point for discussing Buddhist magic in Tibet and beyond After situating Buddhist magic within a cross cultural history of world magic he discusses sources of magic in Buddhist scripture early Buddhist rituals of protection medicine and the spread of Buddhism and magic users Including material from across the vast array of Buddhist traditions van Schaik offers readers a fascinating nuanced view of a topic that has too long been ignored

Everyday Magic in Early Modern Europe Kathryn A. Edwards,2016-03-09 While pre modern Europe is often seen as having an enchanted or magical worldview the full implications of such labels remain inconsistently explored Witchcraft demonology and debates over pious practices have provided the main avenues for treating those themes but integrating them with other activities and ideas seen as forming an enchanted Europe has proven to be a much more difficult task This collection offers one method of demystifying this world of everyday magic Integrating case studies and more theoretical responses to the magical and preternatural the authors here demonstrate that what we think of as extraordinary was often accepted as legitimate if unusual occurrences or practices In their treatment of and attitudes towards spirit assisted treasure hunting magical recipes trials for sanctity and visits by guardian angels early modern Europeans showed more acceptance of and comfort with the extraordinary than modern scholars frequently acknowledge Even witchcraft could be more pervasive and less threatening than many modern interpretations suggest Magic was both mundane and mysterious in early modern Europe and the witches who practiced it could in many ways be quite ordinary members of their communities The vivid cases described in this volume should make the reader question how to distinguish the ordinary and extraordinary and the extent to which those terms need to be redefined for an early modern context They should also make more immediate a world in which magic was an everyday occurrence

Invading the Realm of Demons, Disease, and Death Carl E. Roemer,2024-01-29 This study of the miracles attributed to Jesus in the Gospels begins with a survey of the sciences because in our present cultural context materialism is the dominant approach to and understanding of our world of history and of our very selves If the materialist s understanding is true then there is no such thing as miracles because every event must occur as the result of some previous material events Contemporary biblical scholarship mostly approaches the miracle stories from a materialist point of view It questions their historicity because they violate what has now become the entrenched modus operandi in our culture and society operating with the idea that the universe is a closed nexus of cause and effect The miracles are understood then as products of the community and not historical reports although according to this line of scholarship they may be based on some vague recollection of Jesus s activity that somehow had healing effects Modern science however as one scientist has put it in climbing the mountain of knowledge has reached its peak and found a theologian at the top The sciences in other words have led to the implication that our universe has a creator and that the universe and the human genome have been designed
