Divine Will And The Mechanical Philosophy:

Divine Will and the Mechanical Philosophy Margaret J. Osler, 2004 Religion, Reason and Nature in Early Modern Europe R. Crocker, 2013-03-14 From a variety of perspectives the essays presented here explore the profound interdependence of natural philosophy and rational religion in the long seventeenth century that begins with the burning of Bruno in 1600 and ends with the Enlightenment in the early Eighteenth century From the writings of Grotius on natural law and natural religion and the speculative libertin novels of Cyrano de Bergerac to the better known works of Descartes Malebranche Cudworth Leibniz Boyle Spinoza Newton and Locke an increasing emphasis was placed on the rational relationship between religious doctrine natural law and a personal divine providence While evidence for this intrinsic relationship was to be located in different places in the ideas already present in the mind in the observations and experiments of the natural philosophers and even in the history present experience and prophesied future of mankind the result enabled and shaped the broader intellectual and scientific discourses of the Enlightenment *Oxford Studies in Early Modern Philosophy* Daniel Garber, Steven M. Nadler, 2005 Oxford University Press is proud to present the second volume in a new annual series presenting a selection of the best current work in the history of philosophy Oxford Studies in Early Modern Philosophy focuses on the seventeenth and eighteenth centuries the extraordinary period of intellectual flourishing that begins very roughly with Descartes and his contemporaries and ends with Kant It will also publish papers on thinkers or movements outside of that framework provided they are important in illuminating early modern thought The articles in OSEMP will be of importance to specialists within the discipline but the editors also intend that they should appeal to a larger audience of philosophers intellectual historians and others who are interested in the development of modern thought

Women Philosophers of the Seventeenth Century Jacqueline Broad, 2003-02-27 In this rich and detailed study of early modern women s thought Jacqueline Broad explores the complexity of women s responses to Cartesian philosophy and its intellectual legacy in England and Europe She examines the work of thinkers such as Mary Astell Elisabeth of Bohemia Margaret Cavendish Anne Conway and Damaris Masham who were active participants in the intellectual life of their time and were also the respected colleagues of philosophers such as Descartes Leibniz and Locke She also illuminates the continuities between early modern women s thought and the anti dualism of more recent feminist thinkers The result is a more gender balanced account of early modern thought than has hitherto been available Broad s clear and accessible exploration of this still unfamiliar area will have a strong appeal to both students and scholars in the history of philosophy women s studies and the history of ideas *The Traveling Anatomist* Nuno Castel-Branco, 2025-10-07 Reevaluates Nicolaus Steno s contributions to anatomy and early modern science examining his interdisciplinary interests in their historical context Nicolaus Steno 1638 1686 was a renowned anatomist in his lifetime He reformed the anatomical understanding of glands argued that the heart was a muscle renamed the so called female testicles as ovaries and developed a mathematical model for understanding

muscle contraction discoveries that were fundamental to the fields of anatomy and physiology However other aspects of Steno s life have come to define him his claim that mountains strata reveal the history of the Earth and his conversion to Catholicism as a practicing scientist This excessive attention to his geological discoveries and to asking whether science and religion are compatible Nuno Castel Branco argues has obscured his significant accomplishments as an anatomist The *Traveling Anatomist* thus restores Steno to his rightful place as a crucial figure in early modern science Using Steno s extensive travels as a framework this book depicts him as an active participant in the Republic of Letters Castel Branco traverses Leiden Paris Copenhagen Florence and Rome as he follows Steno in his sojourns through different scientific academies courts and artisanal workshops There he developed new friends some of whom were women with whom he researched and exchanged ideas Drawing on Steno s books correspondence and novel archival material Castel Branco invites us to approach Steno and his accomplishments in anatomy mathematics and geology through the eyes of his contemporaries Doing so Castel Branco reconstructs the rich and overlapping worlds of scientific disciplines that shaped Steno s work revealing the richness of interdisciplinary research in early modern intellectual life And through Steno he illustrates larger developments and new networks of significance in mid seventeenth century science By focusing on ideas scientific genres institutions and friendships Castel Branco offers a way others might also productively study science from the early modern period until today

Pierre Gassendi and the Birth of Early Modern Philosophy Antonia LoLordo,2006-10-30 This book offers a comprehensive treatment of the philosophical system of the seventeenth century philosopher Pierre Gassendi Gassendi s importance is widely recognized and is essential for understanding early modern philosophers and scientists such as Locke Leibniz and Newton Offering a systematic overview of his contributions LoLordo situates Gassendi s views within the context of sixteenth and early seventeenth century natural philosophy as represented by a variety of intellectual traditions including scholastic Aristotelianism Renaissance Neo Platonism and the emerging mechanical philosophy LoLordo s work will be essential reading for historians of early modern philosophy and science

Politics and Eternity: Studies in the History of Medieval and Early-Modern Political Thought Francis Oakley,2022-06-08 This collection of studies in the history of political thought from late antiquity to the early eighteenth century ranges broadly across themes of kingship political theology constitutional ideas natural law thinking and consent theory The studies are linked together by three shared characteristics First all of them explore the continuities that existed during those centuries between legal political thinking and theology Second nearly all of them transgress the sharp dividing line traditionally drawn between the medieval and the modern which did so much in the past to distort our understanding of intellectual developments in the sixteenth and seventeenth centuries Third all of them raise historiographic questions or probe the metahistorical methodological questions which have troubled the field for the past quarter century and more

The Oxford Handbook of the History of Ethics Roger Crisp,2013-01-31 This original and comprehensive volume explores the history of philosophical ethics in the western

tradition from Homer until the present day Leading experts in the field use their expertise and specialist knowledge to illuminate key subjects and ideas in contemporary ethics and survey the history of the discipline **Volition, Rhetoric, and Emotion in the Work of Pascal** Thomas Parker, 2013-05-13 This study identifies and analyzes a compelling theory and practice of persuasion that integrates the complexity of human desire It demonstrates how the philosophical component in Pascal s description of the will makes a seamless integration into a vehicle of persuasion and poetics providing a privileged viewpoint for understanding the author s complete works arguing that the notion of will is of fundamental importance in Pascal s anthropology as well as in his rhetoric This avenue of interpretation is both fruitful and difficult because the word *volonte* means very different things in Pascal and in modern French Beginning by contextualizing the notion of *volonte* and explaining its expanded use in the seventeenth century lexicon the author then endeavors to show that Pascal borrows an essentially Augustinian paradigm of desire to create a depiction of the will divided against itself surreptitiously yearning for what its bearer does not want *Journal of Biblical and Theological Studies, Issue 2.2* Daniel S. Diffey, Ryan A. Brandt, Justin McLendon, 2017-11-03 The Journal of Biblical and Theological Studies JBTS is an academic journal focused on the fields of Bible and Theology from an inter denominational point of view The journal is comprised of an editorial board of scholars that represent several academic institutions throughout the world JBTS is concerned with presenting high level original scholarship in an approachable way Academic journals are often written by scholars for other scholars They are technical in nature assuming a robust knowledge of the field There are fewer journals that seek to introduce biblical and theological scholarship that is also accessible to students JBTS seeks to provide high level scholarship and research to both scholars and students which results in original scholarship that is readable and accessible As an inter denominational journal JBTS is broadly evangelical We accept contributions in all theological disciplines from any evangelical perspective In particular we encourage articles and book reviews within the fields of Old Testament New Testament Biblical Theology Church History Systematic Theology Practical Theology Philosophical Theology Philosophy and Ethics **Newton and Newtonianism** J.E. Force, S. Hutton, 2006-04-18 Newton s theology his study of alchemy the early reception of Newtonianism the history of Newtonian scholarship are topics included in the eleven essays that comprise this volume *A Culture of Fact* Barbara J. Shapiro, 2000 Shapiro traces the genesis of the fact a modern concept that originated not in natural science but in legal discourse She follows the concept s evolution and diffusion across a variety of disciplines in early modern England *An Alchemical Quest for Universal Knowledge* Georgiana D. Hedesan, 2016-04-20 History of science credits the Flemish physician alchemist and philosopher Jan Baptist Van Helmont 1579 1644 for his contributions to the development of chemistry and medicine Yet as this book makes clear focussing on Van Helmont s impact on modern science does not do justice to the complexity of his thought or to his influence on successive generations of intellectuals like Robert Boyle or Gottfried Leibniz Revealing Van Helmont as an original thinker who sought to produce a post Scholastic synthesis of religion

and natural philosophy Georgiana Hedesan reconstructs his ambitious quest for universal knowledge as it emerges from the text of the *Ortus medicinae* 1648 Published after Van Helmont's death by his son the work can best be understood as a compilation of finished and unfinished treatises the historical product of a life unsettled by religious persecution and personal misfortune The present book provides a coherent account of Van Helmont's philosophy by analysing its main tenets Divided into two parts the study opens with a background to Van Helmont's concept of an alchemical Christian philosophy demonstrating that his outlook was deeply grounded in the tradition of medical alchemy as reformed by Theophrastus von Hohenheim called Paracelsus 1493-1541 It then reconstitutes Van Helmont's biography while giving a historical dimension to his intellectual output The second part reconstructs Van Helmont's Christian philosophy investigating his views on God nature and man as well as his applied philosophy Hedesan also provides an account of the development of Van Helmont's thought throughout his life The conclusion sums up Van Helmont's intellectual achievement and highlights avenues of future research

Science and Religion Gary B. Ferngren, 2002-08 Written by distinguished historians of science and religion the thirty essays in this volume survey the relationship of Western religious traditions to science from the beginning of the Christian era to the late twentieth century This wide ranging collection also introduces a variety of approaches to understanding their intersection suggesting a model not of inalterable conflict but of complex interaction Tracing the rise of science from its birth in the medieval West through the scientific revolution the contributors describe major shifts that were marked by discoveries such as those of Copernicus Galileo and Isaac Newton and the Catholic and Protestant reactions to them They assess changes in scientific understanding brought about by eighteenth and nineteenth century transformations in geology cosmology and biology together with the responses of both mainstream religious groups and such newer movements as evangelicalism and fundamentalism The book also treats the theological implications of contemporary science and evaluates recent approaches such as environmentalism gender studies social construction and postmodernism which are at the center of current debates in the historiography understanding and application of science Contributors Colin A Russell David B Wilson Edward Grant David C Lindberg Alnoor Dhanani Owen Gingerich Richard J Blackwell Edward B Davis Michael P Winship John Henry Margaret J Osler Richard S Westfall John Hedley Brooke Nicolaas A Rupke Peter M Hess James Moore Peter J Bowler Ronald L Numbers Steven J Harris Mark A Noll Edward J Larson Richard Olson Craig Sean McConnell Robin Collins William A Dembski David N Livingstone Sara Miles and Stephen P Weldon

Encyclopedia of the Scientific Revolution Wilbur Applebaum, 2003-12-16 With unprecedented current coverage of the profound changes in the nature and practice of science in sixteenth and seventeenth century Europe this comprehensive reference work addresses the individuals ideas and institutions that defined culture in the age when the modern perception of nature of the universe and of our place in it is said to have emerged Covering the historiography of the period discussions of the Scientific Revolution's impact on its contemporaneous disciplines and in depth analyses of the importance of historical context to major

Claude III Audran, Arbiter of the French Arabesque Barbara Laux, 2025-10-01 Claude III Audran Arbiter of the French Arabesque is the first substantial biographical study of Claude III Audran a late 17th and early 18th century master of ornament and a proponent of cutting edge design who took inspiration from contemporary sources This work investigates Audran s accomplishments and the factors that impacted the longevity and arc of his successful career taking into consideration the contextual variables that influenced and shaped his work Audran s achievements bridge an important period with the eclipse of the Guild Ma trise and the rise of the Acad mie royale Audran subcontracted young artists such as Watteau Lancret and Desportes in order to circumvent restrictions on guild practice enacted by the crown Looking at his commissions not only reveals the elite taste of his patrons including Louis XIV but also Audran s ability to use elements from popular culture to animate his arabesques which created hallmarks of rococo interior design

The Immanence of the Infinite Elizabeth Brient, 2002 Most scholars would agree that there is an epochal threshold between the world of the Middle Ages and the modern world Agreement on the nature and dynamic structure of that threshold is harder to come by Hans Blumenberg s original and compelling account of the transition from medieval to modern given in his 1966 work The Legitimacy of the Modern Age has received wide attention Elizabeth Brient begins her own account of the transition with an extensive critical assessment of central aspects of Blumenberg s work She elucidates his dialogical method of historical explanation then discusses the shortcomings of his defense of the legitimacy of modernity The transition to the modern world is marked by the process of making infinite the finite medieval cosmos Whereas Blumenberg focused on the spatial infinitization of the universe Brient claims that the process must be understood intensively as well as extensively In the now infinite universe of the new science the problem of finding a measure for man s self assertive activity and for human knowledge comes to the fore The second half of the book focuses on the way in which this difficulty is addressed with conceptual resources developed in the tradition of late medieval Neoplatonism in particular in the speculative thought of Meister Eckart and Nicholas of Cusa Specific attention is given to the way in which Cusanus notion of the immanence of the infinite in the finite responds to the need for a regulative ideal for human knowing This is the first book length treatment of Blumenberg to appear in English and will be a most welcome resource for readers engaged by debates concerning the status of modernity It will be of equal interest to students of Eckhart and Cusanus and to those generally concerned with the transition between the medieval and the modern world

ABOUT THE AUTHOR Elizabeth Brient is Assistant Professor of philosophy at The University of Georgia

PRAISE FOR THE BOOK Blumenberg could not have wished for a more reverent critique of his achievements or a more exacting textual exegesis regarding the sources of their philosophical content all written in a lucid style that is forthright in the defense of the depth of thought during the Middle Ages but also pleasing in its subtle irony with respect to Blumenberg s and the author s own metaphysical creed Walter F

Gassendi's Ethics Lisa T. Sarasohn, 2018-10-18 This is the first book to explore the ethical thought of Pierre Gassendi the seventeenth century French priest who rehabilitated Epicurean philosophy in the Western tradition Lisa T. Sarasohn's discussion of the relationship between Gassendi's philosophy of nature and his ethics discloses the underlying unity of his philosophy and elucidates this critical figure in the intellectual revolution Sarasohn demonstrates that Gassendi's ethics was an important part of his attempt to Christianize Epicureanism She shows how Gassendi integrated ideas of human freedom into a neo Epicurean ethic where pleasure is the highest good yet maintained a consistent belief in Christian providence These views challenged what were then the new systems of philosophy Hobbesian materialism and Cartesian rationalism Sarasohn places Gassendi in his historical and intellectual context considering him in relation to contemporary philosophers and within the patronage system that conditioned his own freedom She investigates the links between his ethical thought and philosophy of science and makes sense of his attacks on astrology Finally her work clarifies Pierre Gassendi's considerable influence on seventeenth century ethical and political philosophy particularly on the work of John Locke and thus on the whole English liberal tradition in political philosophy

Henry More, 1614-1687 R. Crocker, 2013-03-09 Henry More 1614-1687 the Cambridge Platonist is often presented as an elusive and contradictory figure An early apologist for the new natural philosophy and its rational support for Christian doctrine More also defended the existence of witchcraft and wrote extensively on the nature of the soul and the world of spirits A vigorous and prolific controversialist against many varieties of contemporary atheism and enthusiasm More was himself a spiritual perfectionist and illuminist believing that the goal of the religious life was a conscious union with God Until now most biographies of More have ignored these his own preoccupations and have made of him a rather eccentric but important illustrative figure in one of several larger narratives dominated by canonical figures like Descartes Boyle Spinoza or Newton This is the first modern biography to place his own religious and philosophical preoccupations centre stage and to provide a coherent interpretation of his work from a consideration of his own writings their contexts and aims It is also the first study of More to exploit the full range of his prolific writings and a number of unknown manuscripts relating to his life In addition it contains an annotated handlist of his extant correspondence
